**Gambaran Penerimaan Diri Lansia terhadap Vaksin COVID-19 Di RW 03  
Kelurahan Pasie Nan Tigo**

**ABSTRAK**

Corona Virus Disease (COVID-19) adalah penyakit menular yang disebabkan oleh jenis Corona virus (tipe beta ( $\beta$ -CoV)). Guna melindungi diri dari Virus berbahaya ini WHO merekomendasikan tatalaksana tindakan pencegahan penyebaran COVID-19 antara lain adalah *hand hygiene*, *social distancing*, memakai masker dan meningkatkan daya tahan tubuh. Selain itu untuk meningkatkan system pertahanan tubuh melawan virus dengan pemberian Vaksin COVID-19. Melihat aktivitas masyarakat dimedia sosial, masih banyak di temukan seruan kelompok yang menolak vaksin COVID-19 salah satunya lansia. Lansia termasuk kelompok prioritas vaksinasi karena lansia merupakan kelompok berisiko tinggi terkena COVID-19. Penelitian ini bertujuan untuk melihat bagaimana gambaran penerimaan diri lansia terhadap COVID-19. Penelitian ini menggunakan desain kualitatif dengan pendekatan studi kasus dengan wawancara semi terstruktur. Pemilihan partisipan dalam penelitian ini menggunakan snowball sampling yang didapatkan jumlah partisipan sebanyak 5 orang yang berberada di wilayah RW 03 Kelurahan Pasie Nan Tigo. Hasil wawancara dikumpulkan berupa rekaman wawancara ditranskripsikan secara verbatim dan di olah sehingga menghasilkan 4 tema utama yaitu kurangnya pengetahuan lansia tentang Vaksin COVID-19, lansia beranggapan vaksin COVID-19 tidak penting, kecemasan lansia terhadap efek samping vaksin COVID-19, keraguan lansia akan kehalalan vaksin COVID-19. Diharapkan pada pelayanankesehatan agar meningkatkan kuantitas serta kualitas penyebaran informasi mengenai vaksin COVID-19 secara langsung ataupun melalui media sosial mengenai vaksinasi terutama pada lansia di wilayah RW 03 Kelurahan Pasie Nan Tigo.

***Overview of Elderly Self Acceptance of the Covid-19 Vaccine In RW 03 Ward  
Pasie Nan Tigo***

**ABSTRACT**

*Corona Virus Disease (COVID-19) is an infectious disease caused by the Corona virus. virus (beta type ( $\beta$ -CoV). In order to protect yourself from this dangerous virus, WHO recommends the management of measures to prevent the spread of COVID-19, including hand hygiene, social distancing, wear a mask and increase endurance. In addition, to improve the body's defense system against viruses by giving the COVID-19 vaccine. Looking at people's activities on social media, there are still many calls for groups to reject the COVID-19 vaccine, one of which is the elderly. The elderly are included in the vaccination priority group because the elderly are a high risk group for COVID-19. This study aims to see how the elderly self-acceptance describes COVID-19. This study uses a qualitative design with a case study approach with semi-structured interviews. The selection of participants in this study used snowball sampling. The number of participants was five people who were in the RW 03 area, Pasie Nan Tigo Village. Interview results were collected in the form of interview recordings transcribed verbatim and processed so as to produce Four main themes, namely the lack of knowledge of the elderly about the COVID-19 vaccine, the elderly think that the COVID-19 vaccine is not important, the elderly's anxiety about the side effects of the COVID-19 vaccine, the elderly's doubts about halalness. COVID-19 vaccine. It is hoped that health services will increase the quantity and quality of disseminating information about the COVID-19 vaccine directly or through social media regarding vaccinations, especially for the elderly in the RW 03 area, Pasie Nan Tigo Village.*
