ABSTRAK

Penelitian ini merupakan telaah FN B.Ing pada model lapis FN gagasan Rijkhoff. Sumber substantif data adalah teks tertulis dan sumber lokatif adalah www.thejakartapost.com. Kajian ini menemukan sebanyak 141 FN. Namun, FN yang memiliki modifikator berjumlah 99 FN dan tersebar di setiap lapis FN secara acak. Pada L₀, modifikator klasifikasi (τ_0 dan ω_0) terdapat di 44 FN. Pada L₁, modifikator kualitatif (τ_1) terdapat di 21 FN. Pada L₂, modifikator kuantitatif (τ_2 dan ω_2) terdapat di 5 FN. Pada L₃, modifikator lokatif (τ_3 dan ω_3) terdapat di 43 FN. Pada L₄, modifikator wacana (Ω_4 dan T₄) terdapat di 47 FN. Relasi antara modifikator lokatif dan referen-wacana terdapat di 42 FN dan FN kompleks berjumlah 45 FN. Ada 5 FN Kunci yang merepresentasi pesan dari penulis dan perujukan ideologi, yaitu yaitu *the dissertation, an uproar from conservative Muslims, Shahrur's conception of milk al-yamin, the concept of adultery proposed by Shahrur*, dan *the milk al-yamin concept in Aziz's dissertation*. Adapun perujukan ideologi meliputi (a) ideologi kelembagaan, (b) ideologi konfliktual, (c) ideologi praksis, dan (d) ideologi sekunder. Penelitian ini membuktikan bahwa model lima lapis FN ini mampu mengintegrasikan antara analisis bentuk dan fungsi kebahasaan serta menemukan makna terdalam FN hingga tataran wacana atau nilai bahasa.

Kata Kunci: *Modifikator, deskriptif, referen-wacana, model lapis.*

MODIFIKATOR DESKRIPTIF DAN REFEREN-WACANA PADA MODEL LAPIS FRASA NOMINA

ABSTRACT

This research is a study of English NPs in a layered model of the NP proposed by Rijkhoff. The substantive source of data is the written text, while the locative source is on the website www.thejakartapost.com. The result of the study found 141 NPs. However, there are 99 NPs that have modifiers and randomly distributed in each layers. In the L₀, classifying modifiers (τ_0 and ω_0) are present in 44 NPs. In the L₁, qualitative modifiers (τ_1) are present in 21 NPs. In the L₂, quantitative modifiers (τ_2 and ω_2) are present in 5 NPs. In the L₃, locative modifiers (τ_3 and ω_3) are present in 43 NPs. In the L₄, discourse modifiers (Ω_4 and T₄) are present in 47 NPs. The relation between locative and discourse modifiers is present in 42 NPs and there are 45 NP complexes. There are five key NPs that represent the messages from the authors and also provide ideological references, namely *the dissertation, an uproar from conservative Muslims, Shahrur's conception of milk al-yamin, the concept of adultery proposed by Shahrur, and the milk al-yamin concept in Aziz's dissertation*. The ideological references include: (a) institutionalization ideology, (b) conflictual ideology, (c) praxis ideology, and secondary ideology. This study proves that these five layered model of NPs are able to integrate the analysis form and function and also perceive the deepest meaning of NP in the level of discourse or language value.

Keywords: *Modifiers, descriptive, referential-discourse, layered model.*
