STUDI LITERATUR PERAN FARMASI KOMUNITAS PADA ERA PANDEMI COVID-19 DI BERBAGAI NEGARA

ABSTRAK

Coronavirus disease (COVID-19) pertama kali ditemukan di Wuhan, Tiongkok, virus ini berasal dari pasar Huanan yang berada di Wuhan. Kasus ini diawali dengan pneumonia atau radang paru-paru. Tinjauan ini bertujuan untuk menggambarkan penelitian terbaru mengenai farmasi komunitas dalam masa COVID-19. Metode yang digunakan adalah dengan menelusuri beberapa *website* seperti *Scencedirect*, PubMed, dan NEJM. Berdasarkan hasil yang didapat setelah mereview jurnal farmasi komunitas di seluruh dunia meningkatkan pelayanan kefarmasian, memberikan perlindungan diri dan pelayanan kefarmasian kepada masyarakat selama masa COVID-19, memberikan pelayanan jarak jauh untuk menekan penyebaran kasus COVID-19, menjaga cakupan imunisasi antara masyarakat dan staf, dan penjualan obat-obatan dapat dipantau. Memastikan ketersediaan obat untuk menjaga ketersediaan obat dan memantau penyebaran infeksi COVID-19 secara akurat.

Kata Kunci: COVID-19, farmasi komunitas, obat, pelayanan

LITERATURE STUDY OF THE ROLE OF COMMUNITY PHARMACY IN THE ERA OF THE COVID-19

ABSTRACT

Coronavirus disease (COVID-19) was first discovered in Wuhan, China, which started from the Huanan market in Wuhan. This case begins with pneumonia or inflammation of the lungs. The COVID-19 virus can spread through coughing or sneezing, the group at risk of contracting this disease are people who have been in contact with confirmed COVID-19 patients. In less than a month this virus has spread to Thailand, Japan, and South Korea. Article review describe the latest research on community pharmacy during COVID-19. The method used to browse several websites such as Scienedirect, PubMed and NEJM. Based on the result obtained after reviewing community pharmacy journals around the world, improving pharmaceutical services, providing personal protection and pharmaceutical services to the community during the COVID-19 period, providing remote services to suppress the spread of COVID-19 cases, maintaining immunization coverage between the community and staff, and selling drugs can be monitored and ensure the availability of drugs, maintain the availability of drugs and monitor the spread of COVID-19 infection accurately.
