

V. CONCLUSION AND SUGGESTION

5.1 Conclusion

The application of some concentration of purslane extract did not affect on growth parameter such as; plant height, leaves number, root length, fresh weight, dry weight and chlorophyll a of kale. While, gave the difference effect on chlorophyll b and total content of kale.

5.2 Suggestion

Based on research result, research analysis to the effect of purslane extract in other formulation (extraction method) which will be possible to affect significantly on growth and biochemical content of kale or on other plant needed to back up the current report.
