**Gambaran Peran Ibu Terhadap Pencegahan Kekerasan Seksual  
Pada Anak Usia Sekolah Di Kelurahan Parak Batuang  
Kota Payakumbuh 2022**

**ABSTRAK**

Pencegahan kekerasan seksual terutama pada anak usia sekolah perlu dilakukan karena peningkatan angka kejadian di masyarakat. Orang tua khususnya ibu memiliki peran penting dalam menurunkan risiko tindak kekerasan seksual pada anak. Penelitian ini bertujuan mengetahui gambaran peran ibu terhadap pencegahan kekerasan seksual pada anak usia sekolah di Kelurahan Parak Batuang Kota Payakumbuh 2022. Penelitian ini dilakukan dari Februari – Juli 2022 dengan metode deskriptif kuantitatif. Pengumpulan data dilakukan kepada 98 responden dengan teknik *total sampling*. Hasil penelitian menunjukkan 58,2% responden memiliki gambaran peran ibu baik. Gambaran ibu ditinjau dari empat peran menunjukkan peran pengambil keputusan baik (53,1%), peran pendidik baik (88,8%), peran konselor baik (82,7%), peran pengasuh baik (81,6%). Diharapkan dapat mengkaji keterkaitan antar peran yang dijalankan dan pihak DPAP2KB merancang program yang melibatkan ibu dalam pendidikan seksual anak usia sekolah

Kata kunci : Peran ibu, Pencegahan kekerasan seksual, anak usia sekolah

***Overview of the Role of Mothers in the Prevention of Sexual Violence  
For School-Age Children in Parak Batuang Village  
Payakumbuh City 2022***

**ABSTRACT**

*Prevention of sexual violence, especially in school-age children, needs to be done because of the increasing incidence in the community. Parents, especially mothers, have an important role in reducing the risk of sexual violence against children. This study aims to describe the role of mothers in preventing sexual violence in school-age children in Parak Batuang Village, Payakumbuh City 2022. This study was conducted from February to July 2022 with quantitative descriptive methods. Data collection was carried out on 98 respondents with a total sampling technique. The results showed that 58.2% of respondents had a good picture of the mother's role. The description of mothers in terms of four roles shows a good decision-making role (53.1%), good educator role (88.8%), good counselor role (82.7%), and good caregiver role (81.6%). It is hoped that they can examine the relationship between the roles they carry out and the DPAP2KB to design programs that involve mothers in the sexual education of school-age children*
