CHAPTER VI
CLOSING

6.1 Conclusion

The conclusions based on the data processing results and the objectives formulated in this study can be explained as follows.

1. The halal assessment model for meat processing at the Padang City Government Slaughterhouse was made using the Quality Function Deployment method. The result is the checklist form for slaughterhouse's halal assessment that consist of 71 statement.

2. Recommendations for improvement and improvement for the Padang City Government Slaughterhouse based on the halal assessment model that has been made are the addition of storage space for beef/buffalo meat, packaging, labeling, and traceability of this meat processing from the slaughterhouse.

6.2 Suggestion

Based on the research that has been done, some suggestions can be given, including:

1. The Padang City Government Slaughterhouse should be able to use the recommendation of the halal assessment model that researchers have made for the development and progress of the slaughterhouse in the future.

2. This research can be continued by creating the model assessment halal scoring concept.

3. This research can be continued by making a business proposal for a slaughterhouse so operational activities can take place modernly.
