ABSTRAK

Tujuan

Penelitian ini bertujuan untuk mendapatkan informasi yang mendalam serta mengetahui sejauh mana program rehabilitasi bagi pecandu NAPZA dilaksanakan di RSJ Prof H.B Saanin Padang Tahun 2015.

Metode

Penelitian ini menggunakan metode kualitatif. Penelitian ini dilakukan di Instalasi NAPZA RSJ Prof H.B Saanin Padang pada bulan **Januari sampai April** 2016. Penentuan informan dilakukan secara purposive sampling dengan jumlah informan sebanyak 12 orang. Pengumpulan data dilakukan dengan cara wawancara mendalam, FGD, Observasi, dan telaah dokumen.

Hasil

Hasil penelitian menunjukkan bahwa dalam pelaksanaan program rehabilitasi NAPZA di Instalasi NAPZA RSJ Prof H.B Saanin Padang masih terdapat beberapa kendala dalam pelaksanaan dikarenakan adanya kekurangan dari segi tenaga, dana, serta sarana dan prasarana. Selain itu dalam pelaksanaan program rehabilitasi masih ada program yang belum mencapai target yang telah direncanakan.

Kesimpulan

Program-program rehabilitasi yang ada di Instalasi NAPZA RSJ Prof H.B Saanin Padang beberapa diantaranya sudah berjalan dengan baik, sedangkan yang lainnya, seperti : After care dan RGD NAPZA masih belum berjalan dengan semestinya. Disarankan kepada pihak rumah sakit lebih memperhatikan bagaimana pelaksanaan program rehabilitasi di Instalasi NAPZA, sehingga kedepannya dapat berjalan lebih baik dan tidak ada lagi program yang tidak mencapai target.

ABSTRACT

Objective

The purpose of this research is to obtain in-depth information as well as determine the extent of the rehabilitation program for drug addicts held in RSJ Prof H.B Saanin Padang.

Methods

This research uses a qualitative method. This research was conducted in drug Installation RSJ Prof H.B Saanin Padang in January to April 2016. Determination of informants done by purposive sampling with the number of informants as many as 12 people. The data collection was done by in-depth interviews, focus group discussions, observation, and study documents.

Results

The results of the research showed that in the implementation of the program of drug rehabilitation in drug Installation RSJ Prof H.B Saanin Padang there are still some obstacles in the implementation due to shortages in terms of manpower, funds, and facilities. In addition, in the implementation of the rehabilitation program there are program that has not reached the target that had been planned.

Conclusions

Rehabilitation programs that exist in drug Installation RSJ Prof H.B Saanin Padang some of which are already running well, while others, such as: After care and drugs emergency room are still not running properly. It is suggested that the hospital more attention to how the implementation of the rehabilitation program in the Installation drugs, so that the future can walk better and there is no program that does not reach the target.
