ABSTRAK

Lansia merupakan salah satu kelompok rentan yang perlu dikelola karena mengalami ketidakmampuan mempersiapkan diri menghadapi bencana sehingga diperlukan peran Kader Siaga Bencana (KSB) lansia untuk memberikan pembekalan mengenai mitigasi bencana. Mengelola kelompok rentan bukanlah suatu hal yang mudah bagi KSB lansia, diperlukan kemampuan dan kesiapan secara fisik dan mental dalam menjalankan setiap kegiatannya. Tujuan penelitian ini untuk mengeksplorasi kesiapan KSB lansia dalam melaksanakan peran mitigasi bencana di Kelurahan Pasie Nan Tigo. Penelitian ini merupakan penelitian kualitatif dengan pendekatan studi kasus. Penelitian ini dilakukan di RW 11 & RW 12 Kelurahan Pasie Nan Tigo dengan waktu pengumpulan data pada tanggal 6 s/d 7 Juli 2022 dan dilanjutkan kembali tanggal 15 Juli 2022. Partisipan berjumlah tujuh orang dipilih menggunakan teknik *purposive sampling* dan dilakukan wawancara mendalam. Hasil wawancara ditranskrip secara verbatim dan diolah kemudian menghasilkan 4 tema utama yaitu (1) Pengetahuan & Keterampilan KSB lansia, (2) Faktor pendukung dan penghambat kesiapan KSB lansia, (3) Kegiatan KSB lansia dalam mitigasi bencana, dan (4) Persiapan KSB lansia dalam mitigasi bencana. Diharapkan kepada perawat agar dapat berkoordinasi dengan *stakeholder* dalam memberikan penguatan, pendampingan dan pembinaan kepada KSB lansia agar kegiatan mitigasi bencana dapat dijalankan secara berkesinambungan.

**CASE STUDY : READINESS OF ELDERLY DISASTER PREPAREDNESS
 IN IMPLEMENTING THE ROLE OF DISASTER MITIGATION
 IN WARD OF PASIE NAN TIGO**

ABSTRACT

The elderly are one of the vulnerable groups that need to be managed because they experience an inability to prepare for disasters so that the elderly Disaster Preparedness Cadre (KSB) is needed to provide debriefing on disaster mitigation. Managing vulnerable groups is not an easy thing for the elderly KSB, it requires physical and mental ability and readiness in carrying out each activity. The purpose of this study was to explore the readiness of the elderly KSB in carrying out the role of disaster mitigation in Pasie Nan Tigo Village. This research is a qualitative research with a case study approach. This research was conducted in RW 11 & RW 12, Pasie Nan Tigo Village, with data collection time from 6 to 7 July 2022 and resumed on 15 July 2022. Seven participants were selected using purposive sampling technique and conducted in-depth interviews. The results of the interviews were transcribed verbatim and processed and then produced 4 main themes, namely (1) Knowledge & Skills of elderly KSB, (2) Supporting and inhibiting factors of elderly KSB readiness, (3) Elderly KSB activities in disaster mitigation, and (4) Elderly KSB preparation in disaster mitigation. Nurses are expected to be able to coordinate with stakeholders in providing reinforcement, assistance and guidance to elderly KSB so that disaster mitigation activities can be carried out on an ongoing basis.
