CHAPTER VI
CLOSING

This chapter contains conclusion and recommendation based on research.

6.1   Conclusion

1.   The lowest level of usability in the i-learn Andalas University website is the ease of use and satisfaction, with 71%. The highest percentage of the questionnaire is the ease of learning, with 75%, and usefulness, with 72%.

2.   Based on the result, the indicators that need to be improved on the i-learn Andalas University website are ease of use and satisfaction because they have the lowest percentage among indicators.

3.   Various i-learn design prototypes can be used to improve the i-learn website, such as login, dashboard, and course designs.

6.2   Recommendation

1.   Provide the instruction and guidelines for using the i-learn Andalas University website to help users use this system.

2.   Further study could make a new prototype design a web-based, preferably a mobile app.
