Bachelor of Economics

This study aims to explain the impact of unemployment and inflation on economic growth in Sumatera Island 2010-2019. The data analysis technique used in this research is quantitative method with panel data by using Eviews software program. The data used are unemployment rate, inflation rate and GRDP growth rate for the 2010-2019 period on the Sumatera Island taken from Statistics Indonesia. Based on the results of this study, unemployment to economic growth has a negative effect on the Sumatera Island and inflation to economic growth on the Sumatera island has a positif effect.

Keywords: Unemployment, Inflation, Economic Growth
