ABSTRAK

Tujuan Penelitian

Tujuan dari penelitian ini adalah untuk mengetahui perspektif manajemen mengenai fungsi *clinical pathway* dalam menunjang proses pelayanan *sectio caesarea* di Rumah Sakit Dr. Achmad Mucthar Bukittinggi.

Metode

Penelitian ini menggunakan metode kualitatif. Penelitian ini dilaksanakan pada Januari hingga Juli 2022 terhadap 6 orang informan. Data dikumpulkan melalui wawancara mendalam, observasi dan telaah dokumen. Data divalidasi dengan triangulasi sumber dan triangulasi metode.

Hasil

Hasil penelitian menunjukkan bahwa fungsi *clinical pathway* dalam pelayanan *sectio caesarea* dari aspek perencanaan sudah terencana dengan baik. Dari aspek pengorganisasian, *clinical pathway* dijalankan oleh tenaga kesehatan yang langsung memberikan pelayanan *sectio caesarea*. Dari pelaksanaan, perlu komitmen dan masih ditemui beberapa kendala. Dari aspek pengawasan, masih belum dilakukan secara optimal.

Kesimpulan

Clinical pathway dalam pelayanan *sectio caesarea* direncanakan sebagai salah satu syarat dalam akreditasi rumah sakit dan berfungsi sebagai kendali mutu dan kendali biaya. Evaluasi dilakukan oleh Tim *Clinical Pathway* rumah sakit terhadap pelaksanaan *clinical pathway* di pelayanan *sectio caesarea*.

ABSTRACT

Objective

The purpose of the study was to determine the management perspective regarding the function of the *clinical pathway* in supporting the *sectio caesarea* service process at Dr. Achmad Mochtar Hospital Bukittinggi.

Method

The study used a qualitative methods. This research was conducted from January to July 2022 with 6 informants. Data collection was done by in-depth interviews, observation and document review. The data was validated by triangulation of sources and triangulation of methods.

Result

The results of the study show that the function of the *clinical pathway* in *sectio caesarea* services from the planning aspect is well planned. From the organizing aspect, the *clinical pathway* is carried out by health workers who directly provide *sectio caesarea* services. From the implementation, commitment is needed and there are still several obstacles. From the aspect of monitoring, it has not been optimally carried out.

Conclusion

The *clinical pathway* in the service of *sectio caesarea* is planned as one of the requirements in hospital accreditation and The functions as quality control and cost control. The evaluation was carried out by the hospital's *Clinical Pathway* Team on the implementation for the *sectio caesarea* service.
