**ABSTRAK**

**Tujuan Penelitian**

Posyandu di wilayah kerja Puskesmas Lintau Buo ada 26 posyandu, sarana dan prasarana posyandu masih belum memadai, di beberapa jorong pencapaian D/S masih rendah dari target yang ditentukan, terdapat seorang balita yang menderita gizi buruk sejak tahun 2014. Penelitian ini bertujuan untuk mengetahui faktor-faktor yang berhubungan dengan keaktifan kader posyandu di wilayah kerja Puskesmas Lintau Buo II Kecamatan Lintau Buo Kabupaten Tanah Datar Tahun 2016.

**Metode**

Metode penelitian kuantitatif dengan desain *cross sectional study*. Populasi seluruh kader posyandu 130, sampel 48 responden, pengambilan sampel dengan *proportionate random sampling*, dan data diperoleh dengan menggunakan kuesioner. Analisis data menggunakan uji statistik *chi-square*.

**Hasil**

Hasil penelitian kader yang aktif sebanyak 47,9%, pengetahuan tinggi sebanyak 54,2%, tingkat motivasi tinggi sebanyak 60,4%, sarana dan prasarana yang memadai sebanyak 83,3%, dan keterjangkauan fasilitas pelayanan kesehatan yang terjangkau sebanyak 89,6%. Berdasarkan uji statistik diketahui bahwa terdapat hubungan yang bermakna antara variabel pengetahuan ( $p \text{ value}=0,001$ ), variabel Motivasi ( $p \text{ value}=0,033$ ) dengan keaktifan kader posyandu.

**Kesimpulan**

Terdapat hubungan yang bermakna antara variabel pengetahuan dengan keaktifan kader posyandu dan variabel motivasi dengan keaktifan kader posyandu. Petugas Puskesmas Lintau Buo II diharapkan agar memberikan pelatihan kepada kader posyandu minimal 3 bulan sekali dan secara berkesinambungan untuk lebih meningkatkan keaktifan kader posyandu.

**ABSTRACT**

**Objective**

Posyandu in Puskesmas Lintau Buo II has 26 posyandu, facilities and infrastructure are not sufficient, some of rimland achieved D/S is lower than the target set, there was a toddler suffering from malnutrition since 2014. This study aims to determine factors related to the activeness of Posyandu cadre in Puskesmas Lintau Buo II Lintau Buo Sub District Tanah Datar District 2016.

**Method**

Quantitative research method uses *cross sectional study* design. The population of the entire Posyanducadre was 130, samples of 48 respondents, the sampling with a *proportionate random sampling*, and data was obtained using a questionnaire. Data analysis uses *chi-square* statistic.

**Result**

Research results of the activecadreis 47.9%, higher knowledge is54.2%, higher motivation level is 60.4%, adequate facilities and infrastructure is 83.3%, and affordability health carefacilities is 89.6 %. Based on statistical test known that there is a significant relationship between the variables of knowledge (p value = 0.001), motivation variable (p value = 0.033) with the activeness of Posyandu cadre.

**Conclusion**

There is a significant relationship between the variables of knowledge with the activeness of Posyandu cadre and motivational variables with the activenessof Posyandu cadre.The staff of Puskesmas Lintau Buo II is expected to provide training to the Posyandu cadres at least once in 3 months and on an ongoing basis to further enhance the activeness of Posyandu cadre.
