Hubungan Persepsi Fungsi Pengawasan dan Motivasi Katim dengan Pelaksanaan
Timbang Terima Menggunakan Komunikasi SBAR di IRNA Bedah RSUP
Dr.M.Djamil Padang Tahun 2016

ABSTRAK

Komunikasi timbang terima menjadi perhatian penting dalam upaya pelaksanaan *patient safety* serta standar akreditasi rumah sakit karena besarnya angka KTD 37,9% disebabkan karena komunikasi yang tidak efektif saat timbang terima. WHO merekomendasikan teknik komunikasi efektif antar perawat di rumah sakit mengacu pada *Situation, Background, Assessment, Recommendation* (SBAR). Katim merupakan perawat yang mempunyai peran dalam pelaporan kondisi pasien saat timbang terima menggunakan komunikasi SBAR. Penelitian ini bertujuan untuk mengetahui hubungan persepsi fungsi pengawasan dan motivasi katim terhadap pelaksanaan timbang terima menggunakan komunikasi SBAR di RSUP Dr. M.Djamil Padang. Jenis penelitian ini dan desain penelitian adalah analitik dengan pendekatan *cross sectional* dimana jumlah sampel adalah 48 orang katim. Pengambilan sampel dilakukan dengan teknik *total sampling*. Instrumen penelitian yang digunakan adalah lembar observasi dan kuesioner. Data diolah dan dianalisa dengan uji *Chi Square*. Hasil penelitian menunjukkan terdapat hubungan antara persepsi fungsi pengawasan ($p = 0,002$) dan motivasi ($p = 0,002$) katim dengan pelaksanaan timbang terima menggunakan komunikasi SBAR di RSUP Dr. M.Djamil Padang. Rekomendasi dari penelitian ini adalah melakukan evaluasi terhadap fungsi pengawasan kepala ruang dan menyediakan sarana dan prasarana untuk menunjang pelaksanaan komunikasi SBAR saat timbang terima yang efektif.

Kata kunci : fungsi pengawasan, motivasi, pelaksanaan timbang terima, SBAR

The Relationship of Supervisory Function Perception And Motivation of Team Leader with Handover Implementation Using SBAR Communication at Surgical Department of M.Djamil Hospital in Padang 2016

ABSTRACT

Communication during handover process is considered very important to facilitate the achievement of patient safety as well as the fulfillment of hospital's accreditation standard because of lot of KTD 37,9% were caused uneffective communication during handover. WHO recommend an effective communication technique between nurses at hospital which has the aspect points are Situation, Background, Assessment, Recommendation (SBAR). Team leader is a nurse whom has the role in reporting patient's condition when handover using SBAR communication. This study aim to determine the relationship of supervisory function perception and motivation of team leader towards the handover implementation using SBAR communicaton at surgical department of M. Djamil hospital in Padang. This research used quantitative methode with cross-sectional design. Sampling was done by total sampling with 48 respondents. The research's instrument used were the observation sheet and the questionnaire. Data were processed and analyzed with Chi Square test. The result showed a relationship between supervisory function perception ($p = 0,002$) and motivation ($p = 0,002$) of team leader with handover implementation using SBAR communication at surgical department of M.Djamil hospital in Padang. Increasing the role of executive head nurse through the supervisory function and increase the team leader motivation were recommended, so that handover implementation using SBAR communication can be done effectively.
