ABSTRAK

Penelitian ini bertujuan melihat persepsi petani P3A terhadap pengelolaan irigasi di Bandar Sawah Padang, Kabupaten Solok Selatan. Jenis penelitian kuantitatif. Variabel penelitian terdiri dari variabel bebas, yaitu persepsi petani, dan variabel terikat, meliputi perolehan air, alokasi air, sistem pemeliharaan, pengadaan sumberdaya, dan penanganan konflik. Analisis data menggunakan analisis statistik deskriptif. Hasil penelitian menunjukkan: 1) Persepsi petani terhadap pengelolaan perolehan air oleh P3A, terdapat 92% responden mengatakan P3A mempermudah petani dalam memperoleh air irigasi, sementara 8% menyatakan tidak. Selain itu, 87% responden mengatakan P3A menyediakan air dalam jumlah yang besar, sementara 13% responden menyatakan P3A menyediakan air dalam jumlah yang tidak besar, 2) Persepsi petani terhadap pengelolaan alokasi air oleh P3A, 92% responden menyatakan P3A selalu mendistribusikan air pada setiap petani tanpa pembedaan, sementara 8% menyatakan sebaliknya. Selain itu, terdapat 91% petani menyatakan alokasi distribusi penggunaan air memperhitungkan ketersediaan dan kebutuhan air, sementara 9% responden menyatakan tidak seharusnya seperti itu, 3) Persepsi petani terhadap sistem pemeliharaan irigasi, terdapat 7% petani setuju jika sistem pemeliharaan saluran irigasi selalu dilakukan secara gotong royong, sisanya 93% responden tidak setuju. Selain itu, 7% responden menyatakan P3A selalu mendorong petani ikut serta melakukan pemeliharaan dan merawat sistem saluran irigasi, sementara 93% lainnya tidak setuju, 4) Persepsi petani terhadap sistem pengelolaan pengadaan sumber daya untuk pemeliharaan saluran irigasi, 7% responden setuju jika P3A menghimpun tenaga kerja untuk pemeliharaan irigasi, sementara 93% responden tidak setuju. Selain itu, 3% responden menyatakan P3A perlu menghimpun dana melalui iuran kepada petani untuk pemeliharaan irigasi, sementara 97% responden tidak setuju dengan adanya iuran, dan 5) Persepsi petani terhadap pengelolaan konflik dalam pengalokasian air irigasi, dimana 100% responden setuju jika P3A menampung dan menengahi perselisihan akibat alokasi air. Selain itu, 86% responden setuju jika P3A tidak memberikan air irigasi selain untuk pertanian, sementara 14% tidak setuju, alasannya air irigasi dapat juga digunakan untuk keperluan minum ternak, mencuci, dan lainnya.
