**ANALISIS PELAKSANAAN POSYANDU LANSIA DI WILAYAH KERJA
PUSKESMAS AMBACANG KOTA PADANG TAHUN 2016**

xi + 87 halaman, 18 tabel, 1 gambar, 15 lampiran

ABSTRAK

Tujuan

Pelaksanaan posyandu lansia wilayah kerja Puskesmas Ambacang Kota Padang tahun 2015 dengan cakupan 2.77% mengalami penurunan dari tahun 2014 yaitu 19.6% dari target pencapaian 70%. Berdampak pada rendahnya pelayanan kesehatan bagi lansia. Tujuan penelitian untuk menganalisis pelaksanaan posyandu lansia di wilayah kerja Puskesmas Ambacang Kota Padang tahun 2016.

Metode

Jenis penelitian kualitatif, teknik penentuan informan *purposive sampling*. Informan penelitian 22 orang dengan pengumpulan data melalui wawancara mendalam, *Focus Group Discussion*, observasi, dan telaah dokumen. Data diolah melalui reduksi data, penyajian data, dan penarikan kesimpulan, setelah itu dilakukan triangulasi.

Hasil

Hasil penelitian *input*, tenaga pelaksana 3 orang, pelaksanaan posyandu lansia belum sesuai dengan metode, buku KMS lansia belum tersedia, tidak ada media penyuluhan dan tidak ada tempat khusus untuk pelaksanaan posyandu lansia. Pada komponen proses, kegiatan penyuluhan kesehatan dan pemeriksaan tentang kesehatan terlaksana setiap bulan, kegiatan keagamaan dilakukan setiap minggu. Pada komponen *output*, kegiatan posyandu lansia terlaksana namun tidak adanya kerjasama lintas sektor untuk pelaksanaan kegiatan posyandu lansia di wilayah kerja Puskesmas Ambacang.

Kesimpulan

Posyandu lansia di wilayah kerja Puskesmas Ambacang terlaksana, namun mengalami penurunan kunjungan dari tahun sebelumnya. Oleh karena itu disarankan kepada puskesmas mengadakan pelatihan rutin kepada kader posyandu untuk meningkatkan keaktifan kader dan dukungan fasilitas dan dana dari kelurahan agar pelaksanaan posyandu lansia kedepannya bisa terlaksana dengan baik.

**ANALYSIS OF THE IMPLEMENTATION ELDERLY HEALTH CARE AT
AMBACANG COMMUNITY HEALTH CENTER OF PADANG 2016**

xi + 87 pages, 18 tables, 1figure, 15 appendices

ABSTRACT

Objective

Implementation of elderly health care at Ambacang Public Health Center of Padang 2015 2,77% decreased in 2014 which is 19,6 % of the target of achieving 70%. Adversely affects the health services for elderly. This research aimed to analyze the implementation of elderly health care at Ambacang community health center of Padang 2016.

Method

Qualitative research method with informant determination technique that was purposive sampling. Informants in this research as many as 22 people by collecting data through in-depth interviews, focus group discussion, observation and study of the document .The data is processed through data reduction, data presentation, and conclusion, after that triangulation.

Result

The input result research, 3 executors, the implementation of elderly health care not in accordance with the method, the elderly KMS book is not available, there is no media extension and no specific place for the implementation of the elderly health care. In the process component, health education activities and health checks carried out each month, religious activities carried out every week. On the output component, elderly health care activities carried out but the absence of cross-sector cooperation for the implementation of elderly health care at Ambacang Public Health Center .

Conclusion

Elderly health care at Ambacang Public Health Center has been successful, but experienced a drop in visit from the previous year. For that, it suggested to public health care to enhance the activity of elderly health care cadre, facilities support and funds from sub-district for the implementation of elderly health care future could be done well.
