The Cause of Death Form is important to be made promptly and accurately by the doctor in charge when a patient dies in the hospital. That is important to be recorded too, especially during the Coronavirus Disease 2019 (COVID-19) pandemic due to the increase number of COVID-19 death, which significantly changed the health sector and others globally. This study aimed to describe the knowledge and attitude of doctor's in filling out cause of death form of confirmed of COVID-19 cases at RSUP Dr. M. Djamil Padang.

This study was descriptive which used primary data by collecting data from questionnaires that have been filled out by respondents. The technique used in determining sample was a non-probability with consecutive sampling that involved 67 respondents. The data that has been collected then processed and displayed in the frequency distribution table.

The results of this study found that respondents who had a good level of knowledge were 13 respondents (19.4%) and respondents who had a good attitude level were 33 respondents (49.3%) in filling out cause of death form of confirmed COVID-19 cases at RSUP Dr. M. Djamil Padang.

This conclusion of this study was that the respondents who have a good level of knowledge and attitude in filling out cause of death form of confirmed COVID-19 cases at RSUP Dr. M. Djamil Padang only achieve below 50% so that we need effort to be improved that.
