**ANALISIS SANITASI OBJEK WISATA PANTAI PADANG TAHUN 2022**

xi + 119 halaman, 18 tabel, 6 gambar, 19 lampiran

**ABSTRAK**

**Tujuan Penelitian**

Sarana dan Prasarana belum memadai di Pantai Padang serta pengelolaan limbah belum sesuai standar. Penelitian ini bertujuan menganalisis Sanitasi Objek Wisata Pantai Padang Tahun 2022.

**Metode**

Penelitian ini menggunakan metode kualitatif yang dilakukan bulan Februari 2022-Februari 2023 di Pantai Padang dengan informan 12 orang. Teknik penentuan informan menggunakan *Purposive Sampling*. Pengumpulan data dengan wawancara mendalam, telaah dokumen dan observasi. Analisis data menggunakan triangulasi (sumber dan metode).

**Hasil**

Dari penelitian dapat disimpulkan bahwa Sumber daya manusia sudah memenuhi standar dan sudah memadai. Dana pelaksanaan program puskesmas berasal dari BOK, untuk pengelola wisata belum menyiapkan dana penerapan sanitasi. Sarana dan prasarana dari puskesmas sudah memadai, namun fasilitas sanitasi di Pantai Padang belum sesuai standar. Belum ada kebijakan yang mengatur STTU. Pemeriksaan dan penilaian sanitasi di Pantai Padang belum dilakukan. Sehingga belum dilakukan monitoring serta evaluasi pencatatan dan pelaporan.

**Kesimpulan**

Penerapan sanitasi objek wisata Pantai Padang belum berjalan optimal dan inspeksi sanitasi di Pantai Padang belum dilakukan. Oleh karena itu, diperlukan adanya kerjasama dari pihak Puskesmas maupun Dinas Kesehatan terhadap pihak pengelola pantai terkait pentingnya menerapkan sanitasi tempat wisata.

**SANITATION ANALYSIS OF PADANG BEACH TOURISM OBJECTS IN  
2022**

xi +119 pages, 18 tables, 6 figures, 19 appendices

**ABSTRACT**

**Objective**

Inadequate facilities and infrastructure at Padang Beach and waste management were not up to standard. This study aims to analyze the Sanitation of Padang Beach Tourism Objects in 2022.

**Method**

This research used a qualitative method which was conducted in February 2022-February 2023 at Padang Beach with 12 informants. The informant determination technique used purposive sampling. Data collection by in-depth interviews, document review and observation. Data analysis using triangulation (sources and methods).

**Results**

Human resources have met the standards and are adequate. Funds for the implementation of the puskesmas program came from the BOK, tourism managers have not prepared funds for implementing sanitation. The facilities and infrastructure of the puskesmas were adequate, but the sanitation facilities at Padang Beach was not up to standard. There was no policy governing STTU yet. Inspection and assessment of sanitation at Padang Beach has not been carried out. So that the recording and reporting of sanitation at Padang Beach has not been carried out and monitoring and evaluation cannot be carried out.

**Conclusion**

The implementation of sanitation at Padang Beach tourism objects has not run optimally and sanitation inspections at Padang Beach have not been carried out. Therefore, there is a need for cooperation from the Puskesmas and the Health Service to the beach manager regarding the importance of implementing sanitation for tourist attractions.
