**ABSTRAK**

**Tujuan Penelitian**

Timbulan sampah di Kelurahan Piai Tengah mencapai 2830 kg/hari namun Kelurahan Piai Tengah tidak memiliki sarana pembuangan sampah. Hasil survei awal didapatkan bahwa dari 10 orang warga, sebanyak 70% warga membuang sampah sembarangan. Penelitian ini bertujuan untuk mengetahui faktor-faktor yang berhubungan dengan perilaku masyarakat dalam membuang sampah di Kelurahan Piai Tengah Kecamatan Pauh Kota Padang tahun 2023.

**Metode**

Jenis penelitian kuantitatif desain *cross sectional*. Penelitian dilakukan di Kelurahan Piai Tengah dari bulan Februari hingga Juni 2023. Populasi penelitian seluruh masyarakat di Kelurahan Piai Tengah dengan jumlah sampel 100 KK (*cluster sampling*). Terdiri dari dua *sub cluster* diantaranya RW 001 dan RW 002. Pengumpulan data menggunakan data primer dan sekunder. Data dianalisis secara univariat dan bivariat dengan uji *chi-square*.

**Hasil**

Hasil penelitian didapatkan bahwa persentase perilaku tidak baik sebanyak 62%, pengetahuan kurang 60%, sikap negatif 39%, sarana dan prasarana kurang memadai 85%, dan dukungan tokoh masyarakat yang rendah 40%. Terdapat hubungan yang bermakna antara pengetahuan ( $p\text{-value}=0,018$ ), sikap ( $p\text{-value}=0,008$ ), ketersediaan sarana dan prasarana ( $p\text{-value}=0,028$ ), dan dukungan tokoh masyarakat ( $p\text{-value}=0,048$ ) dengan perilaku masyarakat dalam membuang sampah.

**Kesimpulan**

Pengetahuan, sikap, ketersediaan sarana dan prasarana, dan dukungan tokoh masyarakat memiliki hubungan dengan perilaku masyarakat dalam membuang sampah. Disarankan kepada DLH agar melakukan penyuluhan mengenai 3R kepada masyarakat serta pengadaan TPS.

**FACTORS RELATED TO COMMUNITY BEHAVIOR IN DISPOSALTING  
WASTE IN PIAI TANGAH SUB-DISTRICT, PAUH CITY, PADANG CITY IN  
2023**

xii + 82 Pages, 15 Tables, 13 Pictures, 11 Appendices

**ABSTRACT**

**Objective**

Waste generation in the Piai Tangah Sub-District reaches 2830 kg/day but the Piai Tangah Sub-District has no waste disposal facilities. The results of the initial survey found that out of 10 residents, as many as 70% of residents littered. This study aims to determine the factors related to people's behavior in disposing of garbage in the Piai Tangah Village, Pauh District, Padang City in 2023.

**Method**

This type of quantitative research design cross sectional. The research was conducted in the Piai Tangah Village from February to June 2023. The research population was the entire community in the Piai Tangah Village with a sample size of 100 families (cluster sampling). Consists of two sub-clusters including RW 001 and RW 002. Data collection uses primary and secondary data. Data were analyzed using univariate and bivariate tests chi square.

**Result**

The results showed that the percentage of bad behavior was 62%, lack of knowledge was 60%, negative attitudes were 39%, facilities and infrastructure were inadequate 85%, and support from community leaders was low 40%. There is a significant relationship between knowledge ( $p$ -value=0,018), attitude ( $p$ -value=0,008), availability of facilities and infrastructure ( $p$ -value=0,028), and support from community leaders ( $p$ -value=0,048) with community behavior in disposing of garbage.

**Conclusion**

Knowledge, attitudes, availability of facilities and infrastructure, and support from community leaders have a relationship with people's behavior in disposing of garbage. It is suggested to DLH to conduct outreach regarding 3R to the public as well as to procure TPS.
