

Chapter 4

Conclusion

4.1 Conclusion

The types of language styles that found in Jumanji's Welcome to the Jungle Movie and the factors that influence it, researcher can conclude several points. First, with respect to the first purpose of this study, it can be concluded that the main character used five types of language styles based on Joo's theory which are frozen style, formal style, consultative style, casual, and intimate style. The casual style is more widely used because most of the conversations that occur in the movie are the story of five friends who are trapped in the game. Since the movie is an adventure academy genre, researcher did not find a standard style in the movie. Furthermore, in connection with the second objective of this study, researcher analyzed the factors that influence the speech of the main character and found four factors based on Holmes' theory (2017) which are setting, participants, topics and functions. Factors that influence the main character's language style are influenced by participants' social factors due to social distance and social status between players.

4.2. Suggestion and Recommendation.

First, to the readers, researcher suggest learning or understanding about the types of language styles and their functions in using language styles in conversation because it is very important to know so that people can speak according to the situation. Second, researcher are further advised to find the latest theories on language style and include some previous research on language style in Indonesian movies to help other researcher. In addition, it is desirable for future researcher to conduct research on language style in real society because so many objects in the surrounding community can be done because

there is still limited research on language style in society. So that it can be a reference for future researcher
