ABSTRAK

Tujuan Penelitian

Dalam waktu 5 tahun (selama pembangunan *Waterfront City*) capaian indikator STBM pilar pengamanan sampah dan limbah cair rumah tangga (pilar 4 dan 5) di Kota Pariaman belum memenuhi target capaian. Penelitian ini bertujuan untuk menganalisis pembangunan *Waterfront City* terhadap pemenuhan indikator STBM pilar 4 dan 5 di Kota Pariaman.

Metode

Penelitian kualitatif deskriptif dengan pendekatan studi kasus. Informan penelitian berjumlah 11 orang yang didapat dengan teknik *purposive sampling*. Pengumpulan data menggunakan wawancara mendalam, telaah dokumen, dan observasi. Analisis data menggunakan triangulasi sumber dan metode serta menggunakan bahan referensi.

Hasil

Hasil penelitian menunjukkan bahwa terdapat permasalahan dalam komponen input yaitu, sumber daya manusia belum terkoordinasi dengan baik antar lintas sektor, tidak terdapat kebijakan khusus untuk kegiatan, kekurangan dana, dan sarana prasarana. Permasalahan pada komponen proses diantaranya, perencanaan belum sesuai alur, pelaksanaan belum melibatkan STBM, belum ada tim pengawas dan tingkat partisipasi masyarakat dinilai kurang. Sehingga output belum tercapai secara maksimal.

Kesimpulan

Terdapat permasalahan pada komponen input, proses, dan output dalam pembangunan *Waterfront City* terhadap pemenuhan STBM pilar 4 dan 5 di Kota Pariaman. Disarankan kepada setiap instansi yang terlibat untuk berkoordinasi dan melibatkan kegiatan STBM pada pembangunan *Waterfront City* di Kota Pariaman.

**ANALYSIS OF WATERFRONT CITY DEVELOPMENT ON THE
FULFILLMENT OF COMMUNITY LED TOTAL SANITATION (CLTS)
INDICATORS FOR THE PILLAR OF SECURING HOUSEHOLD WASTE
AND LIQUID WASTE IN PARIAMAN CITY IN 2023**

XIV + 157 pages, 25 tables, 10 pictures, 15 appendices

ABSTRACT

Objective

Within 5 years (during the construction of Waterfront City) the achievement of CLTS indicators for the pillars of securing household waste and liquid waste (pillars 4 and 5) in Pariaman City has not met the achievement target. This study aims to analyze the development of Waterfront City towards the fulfillment of STBM indicators pillars 4 and 5 in Pariaman City.

Method

Descriptive qualitative research with a case study approach. Research informants totaled 11 people obtained by purposive sampling techniques. Data collection uses in-depth interviews, document review, and observation. Data analysis using triangulation of sources and methods as well as using reference materials.

Result

The results showed that there are problems in the input component, namely, human resources have not been well coordinated across sectors, there are no specific policies for activities, lack of funds, and infrastructure. Problems in the process components include planning has not been in accordance with the flow, implementation has not involved CLTS, there is no supervisory team and the level of community participation is considered lacking. So that the output has not been achieved optimally.

Conclusion

There are problems in the input, process, and output components in the construction of Waterfront City towards the fulfillment of STBM pillars 4 and 5 in Pariaman City. It is recommended to every agency involved in the construction of Waterfront City and STBM to coordinate and involve STBM activities in the construction of Waterfront City in Pariaman City.
