**Study Komparatif Faktor Determinan Pelaksanaan *Surgical Safety Checklist*  
Antar Rumah Sakit Di Yarsi Sumatera Barat Tahun 2016**

**ABSTRAK**

Pelaksanaan *surgical safety checklit* dengan 3 fase yaitu *sign in*, *time out*, dan *sign out* pada kamar operasi Rumah Sakit Yarsi Sumatera Barat belum 100%, belum semua item dilaksanakan dengan baik. Penelitian ini bertujuan untuk melihat perbandingan pelaksanaan *surgical safety checklist* dan factor determinan antar rumah sakit yang ada di Yarsi Sumatera Barat tahun 2016. Desain penelitian menggunakan *corss sectional komparatif*. Sampel diambil secara *purposive sampling* dengan jumlah 51 perawat kamar operasi. Hasil penelitian menunjukkan bahwa pelaksanaan *surgical safety checklist* pada fase *sign in* 66,0% dilaksanakan, pada fase *time out* 74,3% dilaksanakan, dan pada fase *sign out* baru 48,6%. Faktor determinan pada rumah sakit Yarsi Padang factor yang paling kuat berhubungan dengan pelaksanaan *surgical safety checklist* adalah kepemimpinan yaitu nilai *p value* nya 0,001 dengan OR 0,4 (CI 95% 0,63-31,2), pada rumah sakit Yarsi Bukittinggi adalah factor budaya organisasi yaitu nilai *p value* 0,010 dengan nilai OR 1,2 (CI 95% 0,05-2,93), dan pada rumah sakit Yarsi Simpang Empat yaitu pengetahuan dengan nilai *p value* dan OR 0,001 (CI 95% 0,83-1,71). Pelaksanaan *surgical safety checklist* masih rendah terutama pada fase *sign out* di kamar operasi yarsi sumatera barat, . Saran kepada Rumah Sakit yang di Yarsi Sumatera Barat untuk mengevaluasi pelaksanaan *surgical safety checklist*, membuat *in-house training*, meningkatkan komitmen dokter dan perawat, membuat sistem pengawasan, membuat sistem *reward* dan *punishment*.

Kata kunci : *surgical safety checklist*, factor determinan, pasien *safety*

***Comparative Study Determinant Factors Surgical Safety Checklist  
Implementation of the Inter-Hospital in West Sumatra Yarsi 2016***

**ABSTRACT**

*Implementation of the surgical safety checklist with 3 phases: sign in, time out, and sign out on a hospital operating room Yarsi West Sumatra is not 100%, not all items are properly implemented. This study aimed to compare the surgical safety checklist execution and the determinant factor between the existing hospital environment Yarsi West Sumatra in 2016. Desain use cross sectional comparative study. The sample was taken by purposive sampling with 51 operating room nurses. The results showed that the implementation of the surgical safety checklist in the phase of sign in 66.0% implemented, in the phase of time-out 74.3% implemented, and sign out phase 48.6% implemented. Determinant factor showed, factor more related to the implementation of the surgical safety checklist in Yarsi Padang is leadership with pvalue 0.001 and OR of 0.4 (0.63 to 31.2), the hospital Yarsi Bukittinggi is a factor of organizational culture with pvalue 0,010 and OR of 1.2 (0.05 to 2.93), and the hospital Yarsi Simpang Empat that knowledge with pvalue and OR of 0.001 (0.83 to 1.71). Implementation of the surgical safety checklist in the operating room is still lower in Yarsi west Sumatera, specially in the phase of signing out. Advice to the existing hospital environment Yarsi west Sumatera to evaluate the implementation of the surgical safety checklist, made in-house training, increasing the commitment of doctors and nurses, to make supervision system, and make the rules and punishment for those who do not do it.*
