بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

In the name of Allah, the Most Gracious, the Most Merciful

There is no deity except Him, the ever living, the sustainer of [all] existence. Neither drowsiness overtakes Him nor sleep. To Him belongs whatever is in the heavens and whatever is on the earth. Who is it that can intercede with Him except by His permission? He knows what is [presently] before them and what will be after them, and they encompass not a thing of His knowledge except for what He wills. His Kursi extends over the heavens and the earth, and their preservation tires Him not. And He is the Most High, the Most Great. (Q.S. Al-Baqarah : 255)

And We charge no soul except [with that within] its capacity, and with Us is a record which speaks with truth; and they will not be wronged (Q.S. Al-Mu'minun:62)

For each one are successive [angels] before and behind him who protect him by the decree of Allah . Indeed, Allah will not change the condition of a people until they change what is in themselves. And when Allah intends for a people ill, there is no repelling it. And there is not for them besides Him any patron. (Q.S. Ar-Ra'du:11)

PREFACE

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

All praise to be on Allah SWT, Lord of the world. I would like thanks to Allah SWT for its guidance and mercy therefore my thesis entitled “**Corruption and its effect on Foreign Direct Investment in ASIA PASIFIC+15 Countries**” has finally been accomplished on time without matter problem. This thesis is submitted as a partial requirement to acquire Bachelor Degree at Economics Department of Economic Faculty of Andalas University.

In the process of completion, there are many people who have involved either directly or indirectly. I would like to express my gratitude to those people who made it possible for me to complete this thesis. With all of the humility, my infinitely gratitude I express to:

1. **Prof. Dr. Tafdil Husni, SE, MBA** as Rector of Andalas University.
2. **Dr. Harif Amali Rivai, SE.M.Si** as Dean of Economic Faculty.
3. **Endrizal Ridwan, SE, M.Ec, Ph.D** as the Head of Economics Department, Faculty of Economy, Andalas University
4. **Abdul Khaliq, SE. MA.** as my academic advicer, without his advice and supported in every semester, i will not be able to complete my class.
5. **Dr. Hefrizal Handra, M.Soc, Sc.** as my thesis advicer, without his advice, supervision, and support, this thesis would never had become a reality. I would like to say thank you for your time, kindness, attention, and knowledge during that you have given in during the counseling. I also want to express my sincere and profound gratitude to **Endrizal Ridwan, SE, M.Ec, Ph.D** and **Arie Sukma, SE, M.Sc** as my thesis examiner.

6. All of lecturers and teaching staff Economics Department, Faculty of Economy, Andalas University.
7. Personnel administration/ the secretariat of Economics Department, Faculty of Economy, Andalas University.
8. My truly beloved family. For my Father Ajisman, thank you for being role model and always supporting me during my college time, thank you for your work hard that you do for our family and for me especially for my education and organization activities, you are the one who always make an effort to support my activities, even though it is in our hard times, thank you for teaching me to be strong and to be hard work for my dreams, thank you for always being patient to me, I hope after this I can make you proud and make you happy because I can work by myself and make you happy. You are The Best Father in The World. . For my Bunda Yonvinda. Actually I don't know what to say but I want to say thank you for the love that you already gave to me since I was born until today, thank you for being a listener and always understand myself, no one can understand myself better than you Bunda, thank you for always calling me during my time in college, I am so sorry if I was too busy with my activities here, thank you for your smile, for your support that always becomes a mood booster, thank you for your advice and always remember me to put all the things to Allah, thank you for your food that accompanied during the process of this thesis in Jakarta, thank you for always being my friend for hangout, culinary, shopping. Thank you for the talks that we've been through almost every night, I hope after this, I can make you happy as a mother, I really grateful to have you as my Bunda in this world. I feel I am the luckiest son in this World because of you. Ayah, Bunda, Finally I did it!, I feel I am the luckiest person because I have a parents who always give the best effort and the love for his son, I promise, I will do my best after this to make you happy. You guys are my everything. For my sister Virsha, Thank you

for become my sister, become a friends since you were born, remember all the things that we did in our childhood time, singing, playing, dancing, taking a picture, and now you already grow up, you are the one who always text me first and call me to ask about my condition in college time, i am sorry if i really seldom to do that for you, thank you for always caring about me, i hope that yu can achieve whatever your dreams, your goals,i just want you to know that you are a honest, rational, and a kind and lovely person, and i just want you to know that i am so proud to have you as my sister just the way you are. For my nenek husna, thank you for your ask that become the beginning of the story about how i study here, its because of you, i learn so many things in here during my college time especially to be a minangnese, thank you for your support, for your wish for me. I know i cannot often to visit you but you always happy when i visit you, thank you for your rice every month that support my life in padang, its really important for me, i wish that you still blessed with your health and we can spend more time, i really love you nek. For mak uwo and mama mit, thank you so much for every your support from your food, your advice, your help, thank you so much, its become a part of my life and i will never forget about it. And i just want to give my gratitude for you mak uwo and mama mit. Thank you for kak nicky for always help me and become a friends for hangout during my college time,thank you for all the story that we shared, thank you sistar.

9. For my Pornoers, even we are busy with our daily activity and has a different schedule but you always have a time to send a supported message for me and it's cheering me up! Thank you yaa and miss you guys!
10. For My Biro Partners, Winda Rahmadona Putri, S.E (putridona), Ririn Listriana S.E (yiyin), Wenny Widiatika, S.E (nyy), Rima Restu Ananda, S.E (rimsce), Roni Alfitra, S.E (oni), Iza Andika, S.E (zaa), Oktaresa Patricia (okta) and Venny Dwi Putri (venny). Thanks for always

support me, amused me, listen to my complains and for giving the suggestions and for okta and venny keep fighting and finish your study as soon as possible okay!

11. Thank you for Whiplash! Bebe, Andin, Nita, Cici, Bie, Nada, Epi, Tiwie, Agil, thank you for being my teammates and my new family, i hope that we will be long last yaaaa, good luck for your journey in AIESEC and outside AIESEC, i really grateful to be a part of this team and end my journey in AIESEC with you guys, i just want you to know, You guys are The BEST thing that i have in this Year. All of our laugh, tears, struggle, smile, you guys are the Best part of my life in this year.

12. Thank you for POWER RANGERS! Abak, Bang Fandra, Awi, Bebe, Andin, thank you for fill my college time with fun, share, gossip, hang out, laugh, thank you for the insight that you guys give to me, thank you for all the laugh, the culinary, thank you for all karaoke, i hope the best for our future and i hope we can atake a trip to south east asia lah yaaaa, amiiiiinnnnnn. Last, thank you for being receh.

13. For Bebe, Andin, thank you for fill my college time with laugh, share, all the karaokes, lunch, spend time to work for thesis in McD, share all the fears that we've been through, struggling together for thesis,thank you , you guys are the best.

14. For Dissa Melina, Thank you for become my second advisor for my thesis haha, i would like to say my big thanks for your willingness for help me since the first time i ask you to help me about my thesis, thank you for your patience for every my ask and my not patience things during this thesis, thank you for always advice me all the thngs for my thesis, thank you for all of your share to me, i learn a lot from you about your life and i wish you all the best for you future,i will never forget about your help and your kindness, lets support each other to achiever our goals yaaah.

15. For Vuji, Yessy, Iqbal and Mike, my thesismate who ahve struggle together since proposal, thesis, acc, seminar until revision, thank you for the motivation that you guys give to me, thank you for all the things that you gusy always tell me about the thesis and all the things, i really thank you and happy to have a thesis mate like you guys, we really struggle together, everything together yaaaa! I wish all the best for our future.

16. Thank you for Biro Mates, a friends for the same struggle for November Graduation, Fahmi, , Wella, Velin, Aldi, Iza, Mahdi, Ratna, Aesha, Caher, Tika, Lia, Sule, Dyna, Razik, Wandi, Tika, Wulan, Yana, Carissa, Pretty, Ingid, Yani, Mesa, Monic, Mike, Vuji, Yessy, Wulan, Aisyah, Bang Rafki for all the motivation, laugh, helps from the thesis process, acc, seminar, revision until the preparation for graduation, i just know you guys for 2 months and suddenly we become a close friends who can chit chat , have lunch together, share without any hesitation, eventhough gossip and jokes for seminar and revision, you guys are really give me a color in the end of my journey in my college, you guys are the most enjoyable and important part in my thesis time. Let's we celebrate our graduation together and achieve our dreams together yeay!

17. For Nora, who become my best friends during my college time in padang, thank you for all of your help for me, i can't count because you helped me a lot during my time in here, thank you for your sincere to take me as your friends, thank you for litsening me in my hard times and always support me, your weird acts that sometimes make me bad mood, thank you for the trip that we did and the hang out. I am gratefull to have you in here.

18. For my Gebor Mujaer team, bang kiwie, kak windy, bang fandra, thank you for being my teammates in ERBD team, thank you for being my sister and brother for me and give me a lot of advice and make me become more mature, thank you for all the treat that you give to me because i am the youngest one in the team, for IGIPainter, Vina, Nana, Feby, my lovely

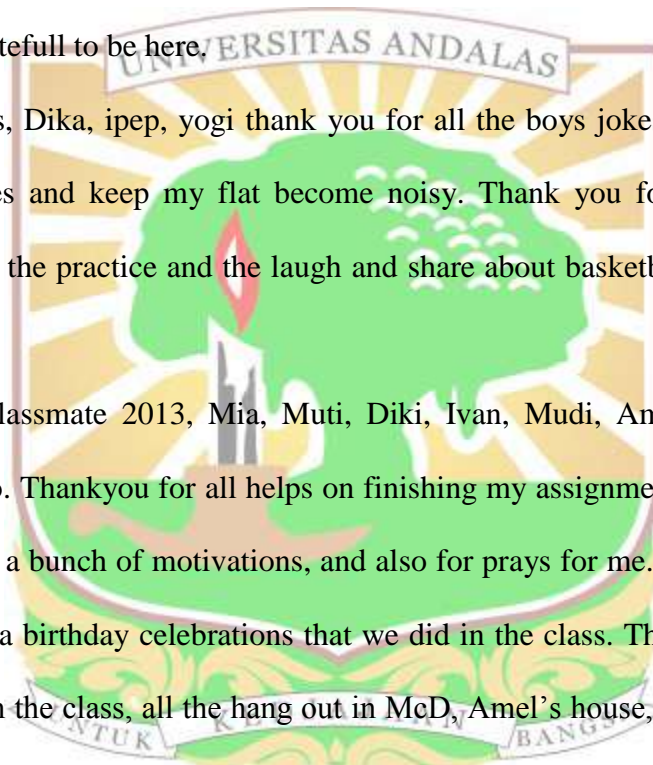

kiddoss, thank you for become a part of my life, thank you for all the hang out and laugh that we do untill now, thank you for every experience that we've been though together as team and friends, i wish all the best for our future guys.

19. For Supernova, Falcon, and afdal, nadin, iqna, bang ihsan, yanda, ghina, Kak Ica and all of Aiesecer from Glorious, ori 22 and everyone that i cannot list one by one, thank your for all the journey and adventure that we had. I wish goodluck for all of us, you guys are the one who develop me and become a biggest part for my time in padang, you guys are the reason why i stay and gratefull to be here.

20. For The Flat Boys, Dika, ipep, yogi thank you for all the boys jokes and stories, thank you for sharing movies and keep my flat become noisy. Thank you for fekon basketball and morning camp for the practice and the laugh and share about basketball during the practice.. Thank you guys.

21. For My lovely Classmate 2013, Mia, Muti, Diki, Ivan, Mudi, Amel, Rimka, Vella, Via, Uswah, and Ridho. Thankyou for all helps on finishing my assignment, and every test, thank you for giving me a bunch of motivations, and also for prays for me. Thankyou for all of the stories, jokes and a birthday celebrations that we did in the class. Thank you for all the trip, all the go out from the class, all the hang out in McD, Amel's house, Muti's house. This will always be memorable and I wish all of us can achieve our dream and our future as soon as possible. I hope that someday we could take a full-team-abroad-trip haha Aamiinn.

22. For my Seniors in IE INT 2012, Bang Imam, Kak Peje, Kak Ghina (nha) Bang Adi, Kak Duva, Bang Fandra, Kak Deges, Kak Alif, Kak Menye, Bang Randy, Kak Umay, Kak Iza, Bang Bardy, Bang Egy (Bro), Kak Fiqa, Kak Sisqa, Kak Fonny, Thank you for your help during my time in college for assignment, ukt, and test, thank you for the laugh in biro and class, you guys are give a special collor in my college time especially in biro where we

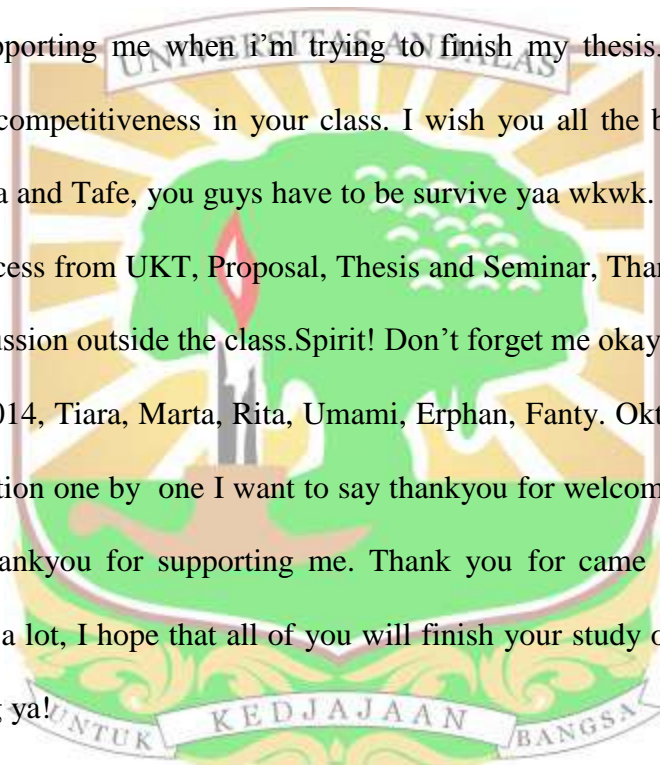

laughed and talked loudly, i wish all the best for your life guys. And spirit for bang egi, bang bardi, bang randy, kak menye and kak umay for the thesis, i believe you guys can finish soon.

23. For My Juniors International Economics 2015, Olla, Dilla, Hesti (Raisa), Aulina, Ghina, Alya, Tafe, Fadhel, Tovan, Novi, Nces, Maijoyan, Jay, Dina, Dendi, Novi, Ona and all of you guys , thankyou for all of the times that we've spend together. I always met you almost every my semester and sometimes i think that you were ma second classmates haha. Thankyou for supporting me when i'm trying to finish my thesis. I am gonna miss the situation and the competitiveness in your class. I wish you all the best for your academic, especially for Alya and Tafe, you guys have to be survive yaa wkwk. I wish you guys are the best for every process from UKT, Proposal, Thesis and Seminar, Thank you for the cheers in the class and discussion outside the class. Spirit! Don't forget me okay, Bang riva loves ya!

24. For My Juniors 2014, Tiara, Marta, Rita, Umami, Erphan, Fanty. Okta, phella and all of you who i cannot mention one by one I want to say thankyou for welcoming me when I come to your class and thankyou for supporting me. Thank you for came and support me in my seminar, it means a lot, I hope that all of you will finish your study on the right time, this is your year. fighting ya!

25. My KKN's Friends in Nagari Koto Baru, especially in Tabek Panjang, Yori, Bibah, Tika, Thank you for all of our time during kkn and after kkn. I know we always busy since october but i hope we can be full team again someday. I wish that all of us could finish our study and get job as soon as possible. And meet up as soon as possible, fighting for our future and yori for your thesis ya!

26. For my friends in Ilmu Ekonomi 2013, i couldn't mention each of your name but I want to say thankyou for the support and it was really nice to know you.

27. Great and many thanks to other parties who cannot be mentioned above, all of your helps are very meaningful for me. May Allah will reply better. Aamiin.

Finally, with all of my humanity I express thank you so much for people who fully unstated in this section. Your motivation, support, attention, and prayare the most precious things for my life. Wishes the best luck of us forever and always.

**CORRUPTION AND ITS EFFECT ON FOREIGN DIRECT INVESTMENT
IN ASIA PASIFIC+ 15 COUNTRIES**

Thesis by: **Muhammad Riva**
Thesis Advisor by: **Dr. Hefrizal Handra, M.Soc. Sc**

ABSTRACT

The purpose of this research is to see the effect of corruption on Foreign Direct Investment in fifteen ASIA PASIFIC Countries. Corruption in this research measured by Corruption Perception Index (CPI) as well as Foreign Direct Investment measured by FDI Inflow. This research also use another independent variable such as GDP Growth, Number of Trade, Government Expenditure, and Gross Capital Formation. The methodology which is used in this research is panel data with cross section of fifteen countries from developed and developing countries and time series data from 2006-2015. The research shows that Corruption which measured by CPI has a positive relationship with FDI.

Keywords: Corruption, Foreign Direct Investment, GDP Growth, Number of Trade, Government Expenditure and Gross Capital Formation, Panel Data.

This thesis has been presented in the thesis examination and successfully passed the thesis examination on October 13th, 2016.

The abstract has been approved by the advisor and examiners.

CHAPTER I

INTRODUCTION

1.1 Research Background

In recent years, globalization of the world economy has been created a significant increase on Foreign Direct Investment (FDI). There are so many Developed and especially developing countries who are more to be open to international Trade and Business Operation. It has been noticed that the expansion of international companies and the economic partnership between countries in terms of bilateral or regional partnership has created the rise of FDI in this last decade.

These activities has many a positive effect on economic growth and economic development for the countries where they invest. Actually FDI has a significant effect on the economic growth of the host countries because FDI can stimulates domestic formation, business expansion, and Capital formation. FDI has also a benefit to enhance financial and technology transfers, boosting export and decreasing unemployment to the host countries. Because of that, FDI has an important role in increasing economic growth and productivity in the country (Smailbegovic,2015).

The Positive effect of FDI is usually associated with the environment of host countries as well as its absorpion capacity. But the effects of FDI is not the same for all countries. The success actually depends on the level and development of the social and economic development in the country and the ability of government and domestic companies in bringing and exploiting the benefit of FDI in the best way.

In order to become an attractive place for the location of FDI is not easy, Foreign Investor has so many consideration in investing their money on the host country, some of them

are used to see the past experience to review whether their investment was a good case or a bad case, whether they got profit or loss, but some of them use the information and trends about the economic, securities, social in the host country whether the condition is stable or not stable. The investor has also see the problems in the countries such as securities, political stability, Public Administration for establishing companies and one of the biggest economic problems that slowing down the FDI and economic development is corruption.

Now we are living in globalization which make the fast moving world that influencing all of us. We are getting used to the the idea that the intergration of economics without any burden exchange of culture and societies. People are free to come and choose the way in developing their business based on their interest and that is why the movement of FDI has been significant increase in this last decade but unfortunately, there are many of culture and societies suffering from corruption. Corruption becomes the main problem of economics in this modern era. Corruption becomes a concern for all countries to fight the corruption with their effort, especially in several nations such as in Indonesia, Myanmar, India, Malaysia, Laos and any other nations in Asia Pasific Countries.

Corruption is an illegal payment from private ownership to public agents or government for privates interest or benefits. The practical of corruption has been common in the process of the establishment of International Company or the investment process itself, this trends makes so many researcher study how corruption affect into Foreign Direct Investment. There are many literature that said that corruption makes the change of governments administration, such as reducing inefficiency and minimizing time cost. Corruption has also make the government administration turn into more efficient with several sort of bribes, Corruption is still has a big impact to the society through ineffective programs, ineffective distribution of employment, ineffective distribution of productivity, income and so on (Ohlson, 2007).

Corruption has become the main issue of any economic development. Corruption is a deadly problem which attacks the entire society through reforming the mindset and the norms of societies and also influencing the development of the countries. It is the essential way that influences the growth of the economy and the advancement of the nations. Due to the curse of corruption, social trust has been lost badly, which led towards imbalance of income through the system, prospect of labor, productivity and education.

Corruption is defined based on the World Bank as the abuse of public officers to private benefit. Corruption is every action between actors from the Government administration and the private through collective utilities that are illegally changed into private gains, according to Transparency International, corruption is a misuse of political capability for personal benefit.

Corruption is indeed one of the main issues in long run economics and the development of society, especially in the developing countries who suffer from practical corruption such as Indonesia, Myanmar, Malaysia, Philippines and etc. It influences the growth of the economy and the development of the country but also influences the government institution negatively from the executive until the parliament. It is a manifestation and goal of institutional inadequacy with negative outcomes to the growth of economy and benefit for the private parties.

As corruption has adversely influenced economic and social development of developing as well as developed nations, major institutions started testing the sources and solutions of the corruption. World Bank had been diagnosed corruption is one of the single greatest problems in economic and development of society. It diminishes the advancement through breaking the law and regulation and reduces the government authority on where economic growth depends on their operation. IMF states, "Many of the reasons of corruption are

the gap of the economic condition, and so are its consequences-poor governance clearly is disturb the economic activity and welfare”.

As time gone by years, Indonesia and several of the Asia Pasific 's nation has been consistently listed by Transparency International as one of the greatest corrupt county in the global era. Corruption dated become very endemic inside the nations which it influences everyone from the village level until the center of power in Big Cities.

Massive corruption has been stated as one of the main reason for Indonesia's and other countries in ASIA PASIFIC+15 had suffered from economic stagnation that occurred after the survive from Economic Crisis that happened in Asia. The questions to be answered on this research are: Why corruption is so endemic in ASIA PASIFIC+15 Countries? What factors (economic, political, socio-cultural) cause corruption so common inside the ASIA PASIFIC+15? What are the consequences of corruption, especially for the economic activities?

Different perspective of corruption appear in various perceptions in society and sectors. Several cultures accepted corruption a higher extent while in other cultures noticed as a strong criminal offense. Corruption is found all over the Globe, in both Rich and developing countries, whether it is a large or a small country. An actual bribe itself also differs from culture and sector, count on the environment, following to fit into that specific environment.

Public corruption decrease the productivity of as country's government through actions which are against the law, whereas private corruption exploits private-own companies and individuals through organized crimes (Mauro, 1997). Furthermore, corruption has been noticed in several cases as nepotism and bribery.

Usually these perspectives of corruption emerge in the private sector, but can also be

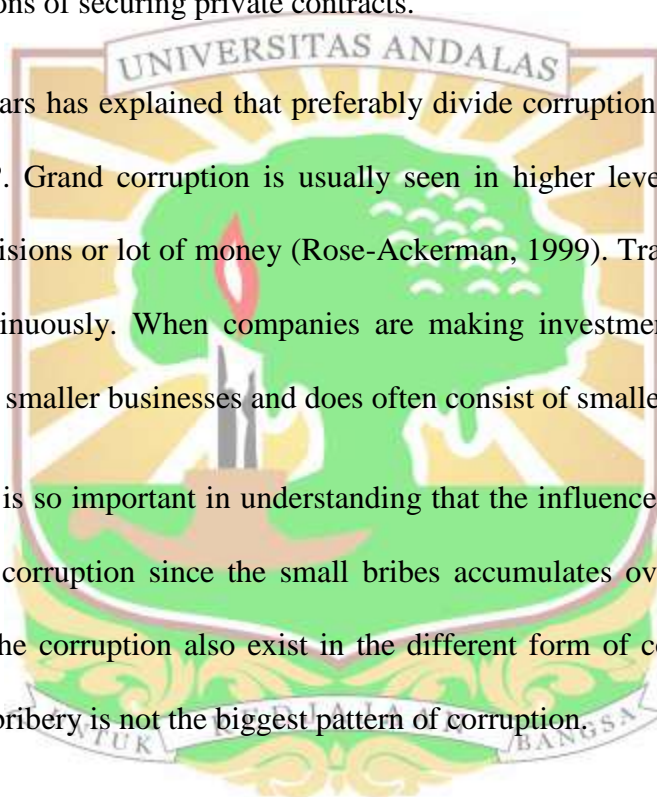

detect in the government institution. Nepotism involves favoritism to partner together with close friends. Nepotism is took as poor recruitment and shortcuts in the selection procedures (Rose-Ackerman, 1999). Fraud is another type in corruption that exists in both Government administrations and also Companies, which is acknowledged as internal corruption.

This is often executed in the firms by own employees. The greatest common corruption-instrument is bribery. Bribery is an offer money in exchange for benefits and this may be encountered in situations of securing private contracts.

Some of scholars has explained that preferably divide corruption into Grand corruption? and Petty corruption?. Grand corruption is usually seen in higher level of a government and involve important decisions or lot of money (Rose-Ackerman, 1999). Transfers of large amounts of money occur continuously. When companies are making investments. Petty corruption is indicated for bribes in smaller businesses and does often consist of smaller money value.

However, this is so important in understanding that the influence of petty corruption can be as large as grand corruption since the small bribes accumulates over time. Meanwhile, in developed countries the corruption also exist in the different form of corruption. In developed country like the U.S, bribery is not the biggest pattern of corruption.

For example When former New Orleans mayor who named as Ray Nagin was lived in the jail for a case of Corruption during his time as major was not because of bribery but it cause of money laundering, falsifying tax returns, and other similar actions. The same is common for other U.S. public officials or provate sector people who are arrested because corruption whether it's abuse of capability as goverment, harassment, money laundering, or favoritism, it's still corruption. The truth is, the U.S has its portion of corruption scale, neither is it the least.

1.2 Research Problem

According to the explanation above, corruption becomes a root Issue in the economic activities because corruption uses a public power for a personal interest.

Corruption influencing in the culture and norms and the society. This phenomenon also influencing the economic development which is the Foreign Direct Investment which become a key to boost the economic development in Asia Pasific Countries, from these explanations, the author will simply the question are

- 
- a. What are the effect of corruption on Foreign Direct Investment in Asia Pasific+15 Countries ?
 - b. Is there a negative or a positive relationship between corruption and Foreign Direct Investment in Asia Pasific+15 Countries?
 - c. How to fight corruption in developed and developing countries in Asia Pasific Countries?
 - d. What are the factors of Corruption in Asia Pasific Countries?

1.3 Research Objectives

Based on the explanation from the research problem, the author want to know about the influence of corruption into income Foreign Direct Investment, basically the purpose and the Goals of this research are:

- a. To analyze the factors of corruption in Asia Pasific+15 Countries.
- b. To analyze the factors of Foreign Direct Investment in Asia Pasific+15 Countries.
- c. To analyze the Corruption Perception Index in Asia Pasific+15 Countries.
- d. Based on the result of the study, the Indonesia Government can formulate the policy to decrease corruption in order to decrease income inequality in indonesia.

1.4 Research Advantage

- a. As the partial fulfillment of the requirements of the Bachelor degree in economics.
- b. For writer, improving my ability in writing report and doing research, especially in corruption effects on Foreign Direct Investment in Asia Pasific+15 Countries
- c. For the reader is expected to add understanding regarding the economic analysis about the contex of the effect of corruption on Income Foreign Direct Investement
- d. For researcher in the field of economics and finance is expected this study can be a reference for next research.
- e. For government will be recommended to take better policy about how to fight the corruption and how can reach a better Foreign Direct Investment.

1.5. The Scope of Discussion

- a. This study focuses only on the effects of practical corruption Foreign in the region of ASIA PASIFIC + 15 Countries because based on research data obtained from Transparency International and World Bank Data, the country's overall region in ASIA PASIFIC + 15 from 2006-2015 has an variative value of corruption perception index from countries who have value above 5 point and countries who have value below 5 point because in this studies will compare the effects of corruption on FDI inflow and compare the effort of eradication of corruption from developed countries and developing countries.

- b. The data which used in this research are secondary data obtained from World Development Indicator of World Bank and Transparency International.
- c. The data of Corruption Perception Index Data, Foreign Direct Investment inflow, GDP Growth, Number of Trade, Government Expenditure, Gross Capital formation, is the yearly data from 2006-2015 from 15 Countries in Asia Pasific Region.

1.6. The Organization of This Study

The Organization writing of this research is as follows:

Chapter I : Introduction

This chapter describes background of this research, problem formulation, purpose and benefits of this research, scope of research, as well as writing system.

CHAPTER II: Literature Review:

This chapter discusses about the definition of dependence and independence variable, the theory of the dependent and independence variable, the correlation between the dependence variable and independence variabile and concepts that can be used as reference material in the discussion, as well as previous research which into the literature of this study.

CHAPTER III: Research Methodology

This chapter describes the data types, data sources and methodology analysis used in the studies and the statistical explanation.

CHAPTER IV: Analysis of Development of Research Variables

This chapter describes the development of the corruption perception index, foreign direct investment inflow, growth of gross domestic product, number of trade, government expenditure, and gross domestic product in the ASIA PASIFIC + 15 countries.

CHAPTER V: Results and Discussion

This chapter uses regression analysis and show the result estimation and discussion as well the policy implications of the research for the government.

CHAPTER VI: Closing

This chapter describes the conclusions that can be drawn from the results of the research conducted as well as explain suggestions for government and the research in the future.

CHAPTER VI

CLOSING

6.1 Conclusion

This research analyse the effect of corruption on foreign direct investment in ASIA PASIFIC+15 Countries by using Corruption Perception Index is used in the model and has a positive correlation with the Foreign Direct Investment Inflow. This research uses another variable which is GDP Growth, number of Trade, Government Expenditure and Gross Capital

Formation. This research has a time series data from 2006-2015 and analyse the fifteen countries in Asia Pasific from Developed Countries to Developing Countries. So the conclusion of this research is :

- a) From the result of the estimation. Corruption which measured by CPI has a positive correlation with Foreign Direct Investment which measured by FDI inflow. The value of the coefficient correlation is 0,195250. This result prove the hypohthesis that Corruption which measured by CPI has a positive correlation with Foreign Direct Investment inflow. This findings means the more clean the countries from practical of corruption will increase the Foreign Direct Investment inflow and vice versa. If the countries has a high practical of corruption, the Foreign Direct Investment will be decrease and will be less attractive for the foreign investor to invest in the countries. This result also prove the theory of Corruption become *Sand the Wheels* in the process of Foreign Direct Investment inflow in the countries.
- b) Eventhough the result shows that Corruption become *Sand the Wheels* in attracting Foreign Direct Investment. The more analysis shows that there is a five countries which have a negative relation Corruption Perception Index and Foreign Direct Investment Inflow. These are Singapore, Malaysia, Thailand, Japan, South Korea and New Zealand. This findings shows that there is a paradox where its supposed to be the Corruption Perception Index has a positive relation with Foreign Direct Investment Inflows in ASIA PASIFIC+15 Countries but there is a negative correlation between Corruption Perception Index with Foreign Direct Investment in these six countries. This result means the higher practical of corruption in the countries will attract more Foreign Direct Investment to the countries. This result also shows that Corruption becomes *Grease The Wheels* in economic activity.

c) There is also a Independent factors that affecting Foreign Direct Investment in ASIA PASIFIC+15 Countries during 2006-2015 such as GDP Growth, Number of Trade, Government Expenditure and Gross Capital Formation. From the result of analysis using panel data shows that Gross Capital Formation has a highest coefficient in affecting Foreign Direct Investment because every the increase of Gross Capital Formation for 1 billion US\$ will increase the Foreign Direct Investment for 1,0625 US\$ with the value of probability is 0.0000. The highest second variables is Trade with every increase of Trade for 1 billions will increase foreign direct investment for 0,969493 with the value of Probability is 0.0019. GDP Growth also have a positive and significant correlation with Foreign Direct Investment with every increase for 1% of GDP Growth will increase Foreign Direct Investment for 0,044400 US\$ with the value of probability is 0.0017.

6.2 Sugestion

A. From the result of the estimation in this research shows that the Countries in ASIA PASIFIC+15 still have a high risk of Practical Corruption that affect negatively into Foreign Direct Investment. The Government in should have a system and decisions that can eradicating the practical corruption as the Foreign Direct Investment will be increase as the result. The Government should increase the Corruption Perspective Index every year as a progress of decreasing practical corruption to attract and ensure the foreign

investor to invest their money in the countries. In order to increase the Corruption Perception Index in the countries, the government should build a system the administration of process that transparent to decrease the practical corruption, the government also should strengthen the Independent Institution who fighting against corruption in each country. The Government also should strengthen the law in eradicating corruption to give a big effect for the corruptor. The Government should build the education of anticorruption because education has a significant role in shaping the behaviour of the citizens so it will decrease the practical of corruption in the future. The government should also build the system that will easier the process of foreign investment in the countries.

B. The other factor which important in affecting Foreign Direct Investment is Gross Capital Formation and Number of Trade. The Government should make the easier process of investing and keep the political stability for the investor to create a good environment for investment in the country. The Government should increase the number of Trade by build more partnership across countries in each country to increase the economic activity and attracting the investor as the growing of the economic activity. The result of these two efforts above will create a higher GDP Growth that will convince the foreign investor to invest their money as the larger size of economy will attract more investor to invest their money.

C. The suggestion for the next research is analyse the effect of the Foreign Direct Investment into Inequality in the countries because the result of the Foreign Direct Investment in the countries is to increase the economy activity, create an employment for people that will increase the productivity and increasing the income of people. It can give an indication how corruption affecting in decreasing the gap between the rich and the needy people.
