ABSTRACT

This study examines the influence of democracy and human development on corruption in Asian democracy country. This research used secondary data of corruption perception index, democracy index and human development index from 2010-2015. The dependent variable is corruption perception index while the independent variable are democracy index and human development index. This study employed panel data as a methodology. This result showed that democracy index does not influence corruption perception index significantly, while human development index give positive and significant impact on corruption perception index.

Keywords: *Corruption Perception Index, Democracy index, Human Development Index*
