ABSTRACT

Background and Objective

Bidikmisi ministrasion is given to prospective students who have good academic potential but not capable in economic status. Bidikmisi students have different obligations and rights with non-bidikmisi students. This makes students' academic achievement in lectures different. There are many factors that affected academic achievement, both internal and external factors. This research aims: to examine the differences in academic achievement between bidikmisi and non-bidikmisi students of midwifery bachelor degree students at Faculty of Medicine Andalas University.

Method

This research was quantitative research by using comparative cross sectional study design that had been conducted of midwifery bachelor degree students at faculty of medicine andalas university from February to September 2018. The sample of this reasearch was students from 2014 to 2016 generation that stand by 76 students who has fulfilled inclusion criteria. The researcher used questionnaire and KHS in collecting data. The data analysis was using univariate and bivariate.

Result

The results showed that 42.1% of bidikmisi students and 65.8% of non-bidikmisi students had high academic achievement. The results of the bivariate analysis shows that there were differences in academic achievement between bidikmisi and non-bidikmisi students (p-value = 0.038).

Conclusion

There are differences in academic achievement between bidikmisi and non-bidikmisi students. Factors that influence differences in academic achievement are interest and academic stress levels.

ABSTRAK

Latar Belakang dan Tujuan Penelitian

Bantuan biaya pendidikan bidikmisi diberikan kepada calon mahasiswa yang memiliki prestasi akademik baik namun kurang mampu secara ekonomi. Mahasiswa bidikmisi memiliki kewajiban dan hak yang berbeda dengan mahasiswa non-bidikmisi. Hal ini menjadikan prestasi akademik yang berbeda pada perkuliahan. Banyak faktor yang mempengaruhi prestasi akademik, baik faktor internal dan eksternal. Penelitian ini bertujuan untuk meneliti perbedaan prestasi akademik antara mahasiswa bidikmisi dan non-bidikmisi di Prodi S1 Kebidanan Fakultas Kedokteran Universitas Andalas.

Metode

Penelitian ini merupakan penelitian kuantitatif dengan desain *cross sectional study comparative*. Penelitian dilakukan di Prodi S1 Kebidanan FK Unand dari bulan Februari-September 2018. Sampel penelitian ini adalah mahasiswa angkatan 2014 sampai 2016 sebanyak 76 orang yang memenuhi kriteria inklusi. Pengumpulan data menggunakan kuesioner dan KHS. Analisis data secara univariat dan bivariat.

Hasil

Hasil penelitian menunjukkan 42,1% mahasiswa bidikmisi dan 65,8% mahasiswa non-bidikmisi memiliki prestasi akademik tinggi. Hasil analisis bivariat menunjukkan terdapat perbedaan prestasi akademik antara mahasiswa bidikmisi dan non-bidikmisi (*p-value* = 0,038).

Kesimpulan

Terdapat perbedaan prestasi akademik antara mahasiswa bidikmisi dan non-bidikmisi. Faktor yang mempengaruhi perbedaan prestasi akademik ini adalah minat dan tingkat stres akademik.
