**Hubungan Dukungan Sosial dengan Successfull Aging di Posyandu Lansia
Wilayah Kerja Puskesmas Lubuk Buaya Padang tahun 2018**

Perubahan kesehatan yang di alami oleh lansia dari berbagai aspek baik fisik maupun psikologis akan dapat berpengaruh terhadap lansia dalam menghadapi kehidupannya. Untuk mencapai keberhasilan atau kesuksesan di masa tua atau yang dikenal juga dengan istilah *sucsesfull aging* dan salah satu faktor yang paling utama dalam pencapaian *sucsesfull aging* ini adalah dukungan sosial. Penelitian ini bertujuan untuk mengetahui hubungan dukungan sosial dengan *successfull aging* di posyandu lansia wilayah kerja Puskesmas Lubuk Buaya Padang tahun 2018. Jenis penelitian ini *analitik* dengan pendekatan *Cross Sectional Study*. Penelitian dilakukan pada 254 orang lansia yang diambil secara *purposive sampling*. Instrumen penelitian terdiri dari kuesioner di adopsi dari *The Multidimensional Scale of Perceived Sosial Support* (MSPSS). Hasil penelitian ini menunjukkan lebih dari separoh (53,5%) lansia mengalami *Successful Aging* kurang baik, Kurang dari separoh (46,9%) lansia memiliki dukungan sosial kurang baik. Hasil uji statistik *chi square* menunjukkan Ada hubungan hubungan dukungan sosial dengan *Successful Aging* pada lansia di posyandu lansia wilayah kerja Puskesmas Lubuk Buaya Padang tahun 2018 (*pvalue*=0,000). Berdasarkan hasil penelitian diharapkan kepada pihak Puskesmas Lubuk Buaya Padang lebih meningkatkan lagi kegiatan-kegiatan lansia di posyandu seperti senam lansia dan kegiatan keterampilan lansia dan diharapkan pada lansia untuk dapat mengikuti kegiatan spiritual keagamaan.

**Relationship between Social Support and Successful Aging at Elderly Posyandu
in Working Area of Lubuk Buaya Health Center Padang City 2018**

Health changes experienced by the elderly from various aspects both physical and psychological will be able to influence the elderly in facing their lives to achieve success or success in old age or also known as successful aging and one of the most important factors in achieving successful aging is social support. This study aims to determine the relationship of social support with successful aging in the elderly posyandu in the working area of the Lubuk Buaya Padang Health Center in 2018. This type of research is analytical with the approach Cross Sectional Study. The study was conducted on 254 elderly people taken by purposive sampling. The research instrument consisted of a questionnaire on the adoption of The Multidimensional Scale of Perceived Social Support (MSPSS). The results of this study indicate that more than half (53.5%) of the elderly experience poor successful aging, less than half (46.9%) of the elderly have poor social support. The results of the Chi square statistical test show that there is a social relationship that supports the relationship with Aging Success in the elderly in the elderly posyandu in the working area of the Lubuk Buaya Health Center Padang city in 2018 ($pvalue=0,000$). Based on the results of the study it is expected that Lubuk Buaya health center will increase the activity of elderly posyandu and provide intensive information Successful Aging in the elderly.
