

## **CHAPTER V**

### **CONCLUSION**

This chapter contains the conclusion obtained from the result of air blower pump design and recommendation for the next research and design of the same product.

#### **5.1 Conclusion**

This research has result the conceptual design of Air Blaster that can reduce the amount of Jengger. The cost of Jengger that saved estimated is Rp 808.946,67.

#### **5.2 Suggestions**

The suggestions that give for the future research are :

1. The future research should be done not only until detail design but should until the testing and refinement phase.
2. The future research should calculate the product economic value that prove the product is good.
