Kajian Pelaksanaan Timbang Terima Perawat Ruangan di Ruang Rawat HCU Bedah  
RSUP Dr M Djamil Padang

### ABSTRAK

Komunikasi merupakan kegiatan yang penting di pelayanan keperawatan. Bentuk kegiatan keperawatan yang memerlukan komunikasi efektif ialah timbang terima. Timbang terima dalam penerapannya masih banyak ditemukan permasalahan yaitu timbang terima yang tidak efektif. Rumah sakit RSUP Dr M Djamil Padang khususnya Ruang Rawat HCU Bedah menerapkan timbang terima yang mekanismenya sesuai dengan Standar Operasional Prosedur (SOP) dan menerapkan teknik komunikasi SBAR (*Situation, Background, Assessment and Recommendation*) dalam penerapan timbang terimanya sehingga hal-hal yang disampaikan dalam timbang terima seharusnya sesuai dengan format SBAR. Penelitian ini bertujuan untuk mengetahui pelaksanaan timbang terima di Ruang Rawat HCU Bedah RSUP Dr M Djamil Padang. Hasil penelitian ini didapatkan bahwasanya timbang terima di Ruang Rawat HCU Bedah RSUP Dr M Djamil Padang dilakukan setiap hari tiap pergantian *shift*. Mekanisme timbang terima yang dilakukan sesuai dengan SOP yang ada. Timbang terima sudah menggunakan metode *bedside handover* dan penyampaian timbang terima sudah menggunakan teknik komunikasi SBAR. Disarankan agar pelaksanaan timbang terima dievaluasi maupun diawasi melalui supervisi dan dilakukan upaya peningkatan oleh rumah sakit RSUP Dr M Djamil Padang

*Study of Nursing Handover Implementation in HCU Surgical Inpatient Room of  
RSUP Dr M Djamil Hospital Padang*

**ABSTRACT**

*Communication is an important activity in nursing service. One of nursing activity that requires effective communication is a handover. Application of handover have many problems, the problems is ineffetive handover. RSUP Dr M Djamil Padang Hospital especially the HCU Surgical Inpatient Room implements a handover whose the mechanism is in accordance with Standard Operating Procedures (SOP) and applied the SBAR (situation, background, asesment and recommendation) technique in implemented the handover so the things conveyed in handover should be in accordance with the SBAR format. This study aims to determine the implementation of handover in the HCU Surgical Inpatient Room of RSUP Dr M Djamil Hospital, Padang. The results of this study found that handovers in the HCU Surgical Inpatient Room at RSUP Dr M Djamil Padang were carried out every day at each shift change. The weigh-in mechanism is carried out in accordance with the existing SOP. Handovers have used the bedside handover method and delivery of handovers has used the SBAR communication technique. It is recommended that the implementation of handover is evaluated and supervised through supervision and efforts to improve it are carried out by Dr M Djamil Padang Hospital*
