ANALISIS PELAKSANAAN PROGRAM PENGEMBANGAN PERTANIAN PERKOTAAN DESA ORGANIK

**(Studi Kasus Kelompok Tani Sungkai Permai, Kelurahan
Lambung Bukit, Kecamatan Pauh, Kota Padang)**

Abstrak

Penelitian dilakukan di Kelurahan Lambung Bukit Kecamatan Pauh Kota Padang yang bertujuan untuk mendeskripsikan pelaksanaan program Pengembangan Pertanian Perkotaan Desa Organik pada kelompok tani Sungkai Permai. Jenis penelitian yang dilakukan yaitu pendekatan deskriptif dengan metode penelitian studi kasus. Metode pengumpulan data yang digunakan adalah wawancara mendalam dengan informan kunci menggunakan panduan wawancara. Analisis data yang digunakan adalah analisis dekriptif kualitatif dengan model Miles dan Huberman. Hasil penelitian menunjukkan bahwa Penerapan program Pengembangan Pertanian Perkotaan Desa Organik di kelompok tani Sungkai Permai sudah terlaksana sesuai Petunjuk teknis program. Terdapat 8 rangkaian kegiatan program yang telah dilaksanakan yaitu Survey lokasi, Pemilihan lokasi, Pembentukan kelompok, Sekolah lapang (SL), Pelaksanaan budidaya sayuran organik, Pendampingan, Pengajuan sertifikat organik, Pemantauan dan Evaluasi. Namun, secara keseluruhan dari 8 rangkaian kegiatan program belum sepenuhnya terlaksana sesuai dengan yang direncanakan. Dan berdasarkan tujuan program yaitu menumbuhkan Desa Organik yang berbasis tanaman sayuran di kelompok tani Sungkai Permai belum sepenuhnya berhasil karena belum adanya anggota kelompok yang menerapkan budidaya sayuran organik dilahan mereka sendiri.

Kata kunci : pengembangan pertanian perkotaan desa organik, kelompok tani, sayuran, pertanian organik.

ANALYSIS OF THE IMPLEMENTATION OF THE ORGANIC VILLAGE URBAN AGRICULTURE DEVELOPMENT PROGRAM

(Case Study of the Sungkai Permai Farmers Group, Lambung Bukit Village, Pauh District, Padang City)

Abstract

The research was carried out at the Lambung Bukit Kelurahan, which aims to describe the implementation of the Urban Agricultural Development Programme of Organic Villages in Sungkai Permai village groups. The type of research carried out is a descriptive approach with case study research methods. The data collection method used is in-depth interviews with key informants using the interview guide. Data analysis used is qualitative descriptive analysis with the Miles and Huberman models. The results of the research show that the implementation of the Urban Agricultural Development Programme of the Organic Village in the Sungkai Permai village group has been implemented in accordance with the technical guidelines of the program. There are 8 series of program activities that have been implemented: Location Survey, Location Selection, Group Formation, Outdoor School (SL), Organic Vegetable Cultivation Implementation, Accompanying, Submission of Organic Certificates, Monitoring and Evaluation. However, a total of eight series of programme activities have not been fully implemented as planned. And according to the goal of the program, growing a vegetable-based organic village in the Sungkai Permai village group has not been fully successful because there are no members of the group that have implemented organic vegetable cultivation on their own land.

Keywords: *development of organic village urban agriculture, farmer groups, vegetables, organic farming.*
