**ABSTRAK**

**Tujuan Penelitian**

Puskesmas Koto Katik memiliki pencapaian target SPM hipertensi yang paling rendah di Kota Padang Panjang tahun 2021 sekitar 11,57%. Tujuan penelitian adalah mengevaluasi pelaksanaan Standar Pelayanan Minimal Kesehatan pada Penderita Hipertensi di Puskesmas Koto Katik Kota Padang Panjang.

**Metode**

Jenis penelitian kualitatif dengan metode evaluasi *Contexts, Input, Process, and Product* (CIPP). Teknik *purposive sampling* sebanyak 11 orang. Metode pengumpulan data yaitu wawancara mendalam, observasi dan telaah dokumen. Analisis data menggunakan *Content Analysis*.

**Hasil**

Hasil penelitian menunjukkan Permenkes RI Nomor 4 tahun 2019 belum semua disosialisasikan ke seluruh petugas. Pemantauan tekanan darah dan edukasi hipertensi belum maksimal serta terapi farmakologi sudah sesuai kebijakan yang berlaku.

**Kesimpulan**

SPM hipertensi perlu diperbaiki dari segi pemahaman petugas terkait Permenkes Nomor 4 tahun 2019, tenaga, sarana dan prasarana, pemantauan tekanan darah dan edukasi kesehatan. Diharapkan kepada puskesmas dapat mensosialisasikan SPM hipertensi, mengoptimalkan pemantauan serta edukasi kesehatan yang efektif.

**ABSTRACT**

**Objective**

Koto Katik Health Center has the lowest achievement of hypertension SPM targets in Padang Panjang City in 2021, around 11.57% The purpose of the study was to evaluate the implementation of Minimum Health Service Standards for Patients with Hypertension at the Koto Katik Health Center in Padang Panjang City.

**Method**

Qualitative research with Context, Input, Process, and Product (CIPP) evaluation method. The purposive sampling technique was 11 people. Data collection methods are in-depth interviews, observation and document review. Data analysis using Content Analysis.

**Result**

The results showed that Permenkes RI Number 4 of 2019 had not been socialized to all officers. Blood pressure monitoring and hypertension education have not been maximized and pharmacological therapy is in accordance with applicable policies.

**Conclusion**

SPM hypertension needs to be improved in terms of staff understanding of Permenkes Number 4 of 2019, personnel, facilities and infrastructure, blood pressure monitoring and health education. It is hoped that puskesmas can socialize hypertension SPM, optimize monitoring and effective health education.
