ANALISIS IMPLEMENTASI PELAYANAN *ANTENATAL CARE* DI WILAYAH KERJA PUSKESMAS SEBERANG PADANG KOTA PADANG TAHUN 2024

xiii + 135 halaman, 17 tabel, 3 gambar, 8 lampiran

ABSTRAK

Tujuan Penelitian

Capaian pelayanan *Antenatal Care* (ANC) di Kota Padang masih belum mencapai target 100%. Tujuannya menganalisis implementasi pelayanan ANC di Puskesmas Seberang Padang Tahun 2024.

Metode

Jenis penelitian kualitatif dengan pendekatan sistem dengan 11 orang informan. Teknik penentuan informan purposive sampling. Penelitian dilakukan pada bulan Maret-Juni 2024. Pengumpulan data dilakukan melalui wawancara mendalam, observasi, dan telaah dokumen. Analisis data menggunakan pendekatan analisis isi.

Hasil

Pelaksanaan pelayanan ANC berpedoman kepada PMK Nomor 21 Tahun 2021 dan PMK Nomor 4 Tahun 2019, adanya perbedaan persepsi terhadap target capaian. Puskesmas sudah memiliki SOP; SDM dan dana sudah mencukupi; tidak adanya alat tinggi badan; Pendataan sudah dilakukan di Puskesmas, namun belum mencakup semua FKTP; Pelayanan 10T yang belum maksimal adalah pengukuran tinggi badan, rendahnya konsumsi TTD oleh ibu hamil, serta pemeriksaan labor; Belum adanya laporan dari jejaring terkait data kunjungan. Cakupan pelayanan ANC per bulan April 2024 yaitu K1=20,6%, K4=16,4%, dan K6=21%.

Kesimpulan

DKK Padang dapat mensosialisasikan capaian data sasaran. Puskesmas segera melengkapi alat ukur tinggi badan, memaksimalkan pemantauan dan sosialisasi kepada ibu hamil, serta koordinasi dengan jejaring dalam pelaporan.

ANALYSIS OF THE IMPLEMENTATION OF ANTENATAL CARE AT SEBERANG PADANG HEALTH CENTRE'S PADANG CITY IN 2024

xiii + 135 pages, 17 tables, 3 images, 8 appendices

ABSTRACT

Objective

The capitation of Antenatal Care (ANC) services in Padang City has not yet reached the 100% target. The goal was to analyze the implementation of ANC services at Seberang Padang health centre in 2024.

Method

The kind of qualitative research with a system approach, 11 person research informants. Sampling profiling techniques. This research was conducted from March to June 2024. Data collection methods with in-dept interviews, observation, and review the documentation. Data analysis was done for content analysis.

Result

The implementation of ANC services was guided by Regulation of the Minister of Health Number 21 of 2021 and Number 4 of 2019, there are differences in perceptions of achievement targets. Health Centre already have SOPs; human resources and funds are sufficient; there is no height tool; data collection has been carried out at Health Centre, but has not covered all FKTP; 10T services that have not been maximized are height measurement, low consumption of blood supplement tablets by pregnant women, and laboratory examinations; There is no report from the network regarding visit data. ANC service coverage at Health Centre as of April 2024 is K1=20.6%, K4=16.4%, and K6=21%.

Conclusion

The City of Padang Health Office can socialize the achievement of target data. Health Centre should immediately complete height measuring instruments, maximize monitoring and socialization to pregnant women, and coordinate with networks in reporting.
