Gambaran Kesiapsiagaan Masyarakat Terhadap Bencana Banjir Di Batu Busuk
Kecamatan Pauh Padang

ABSTRAK

Bencana alam khususnya banjir memiliki dampak signifikan terhadap kesehatan masyarakat dan ekonomi terutama di wilayah yang rawan banjir seperti Batu Busuk, Kecamatan Pauh, Kota Padang. Banjir dapat menyebabkan berbagai penyakit, meningkatkan angka morbiditas dan mortalitas, serta kerugian ekonomi akibat kerusakan infrastruktur dan kesulitan air bersih. Penelitian ini bertujuan untuk mengetahui gambaran kesiapsiagaan masyarakat terhadap bencana banjir di Batu Busuk Kelurahan Lambung Bukit. Jenis penelitian deskriptif dengan pendekatan kuantitatif. Populasi dalam penelitian ini adalah masyarakat di RW 03 Kelurahan Lambung Bukit, Kecamatan Pauh, Kota Padang dengan sampel sebanyak 175 keluarga menggunakan teknik purposive sampling. Hasil penelitian menunjukkan hampir setengah tingkat kesiapsiagaan bencana banjir yang dimiliki responden pada RW 03 Kelurahan Lambung Bukit, Kecamatan Pauh, Kota Padang ialah kategori siap (40,6%). Diharapkan perlu adanya edukasi masyarakat Batu Busuk mengenai kesiapsiagaan menghadapi bencana banjir dengan memanfaatkan forum komunikasi informasi dan edukasi yang telah ada serta memanfaatkan teknologi informasi sesuai perkembangan.

*Community Preparedness Overview for Flood Disasters in Batu Busuk, Pauh
Sub-district, Padang*

ABSTRACT

Natural disasters especially floods have a significant impact on public health and the economy particularly in flood-prone areas such as Batu Busuk, Pauh Sub-district, Padang City. Floods can cause various diseases, increase morbidity and mortality rates, and result in economic losses due to infrastructure damage and water supply difficulties. This study aims to describe community preparedness for flood disasters in Batu Busuk, Lambung Bukit Sub-district. The research is descriptive with a quantitative approach. The population in this study consists of the community in RW 03, Lambung Bukit Sub-district, Pauh Sub-district, Padang City, with a sample of 175 families using purposive sampling techniques. The results of the study indicate that almost half of the respondents' flood disaster preparedness levels in RW 03, Lambung Bukit Sub-district, Pauh Sub-district, Padang City are in the ready category (40.6%). It is hoped that there will be further education for the Batu Busuk community regarding flood disaster preparedness by utilizing existing communication, information, and education forums, as well as leveraging information technology in line with developments.
