Tantangan, Peluang, dan Manfaat Implementasi Teknologi Blockchain dalam Industri Perbankan: Suatu Studi Literatur

Skripsi Oleh: Raniyah Athaya Tharifah
Pembimbing: Dr. Asniati, SE, MBA, CA, Ak, CSRS, CSRA

ABSTRACT

This research aims to identify the main technical challenges faced by the banking industry in implementing blockchain technology, explore the opportunities that arise from the implementation of blockchain technology in the banking industry, and to analyze the benefits derived from the implementation of blockchain technology in the banking sector. The research conducted is qualitative research, using the Literature Review method, the literature search strategy is carried out with PRISMA protocols in selecting journals to be reviewed. The results of this study show that the challenge of scalability is a challenge that is often discussed regarding the implementation of blockchain technology in the banking industry, opportunities for increased security, integrity, and privacy are opportunities that are often discussed regarding the implementation of blockchain technology in the banking industry, and finally, the benefits of blockchain implementation such as increasing efficiency, reducing costs, and increasing security are the benefits that are most often discussed regarding the implementation of blockchain technology in the banking industry.

Keywords: Implementation, Blockchain, Banking, Challenges, Opportunities, Benefits
