## **CODE MIXING IN JALAN2MEN! TRAVEL SERIES**

Fauzan, Ike Revita

### **ABSTRAK**

Skripsi ini membahas penggunaan campur kode oleh 2 pembawa acara dalam *Jalan2Men! Travel Show*, yaitu Jebray (Petra Gabriel Michael) dan Naya (Naya Andita) dalam video Jalan-Jalan Men! musim ke-2. Kajian ini bertujuan untuk mengidentifikasi tipe-tipe dan mendeskripsikan fungsi-fungsi campur kode yang mereka tuturkan. Pengumpulan data dilakukan dengan teknik pengunduhan. Data dianalisis berdasarkan teori campur kode oleh Muysken (2000) tentang tipe campur kode dan teori Hoffman (1991) dan Saville-Troike (2003) untuk menentukan fungsi campur kode.

Dari hasil data ditemukan 58 kalimat yang mengandung campur kode. Kalimat-kalimat tersebut kemudian dikelompokkan berdasarkan tipe-tipe (1) *insertion*, (2) *alternation*, dan (3) *congruent lexicalization*. Tipe campur kode yang paling banyak digunakan adalah *insertion* sebanyak 25 data (43,1%), kemudian diikuti oleh tipe *alternation* sebanyak 24 data (41,4%), dan yang paling sedikit adalah tipe *congruent lexicalization* sebanyak 9 data (15,5%). Fungsi campur kode yang paling banyak digunakan adalah (1) *talking about particular topic* (70,7%) sebanyak 41 data, kemudian diikuti oleh (2) *because of lexical need* (10,3%) sebanyak 6 data, (3) *to soften and strengthen request or command* (8,6%) sebanyak 5 data, (4) *repetition for clarification* (6,9%) sebanyak 4 data, dan (5) *interjection (inserting sentence fillers or sentence connectors)* (3,5%) sebanyak 2 data. Dapat disimpulkan bahwa mereka cenderung melakukan campur kode dengan tipe *insertion*. Mereka menyisipkan kosakata Bahasa Inggris dalam tuturan di video, sedangkan, *talking about particular topic* menjadi fungsi yang paling banyak digunakan karena latar belakang masing masing penutur yang pernah tinggal dan belajar bahasa Inggris di luar negri, mereka merasa lebih nyaman menggunakan bahasa Inggris dalam menyampaikan beberapa tuturan.

**Kata kunci:** *campur kode, Jalan-Jalan Men!, Jalan2Men!, tipe campur kode, fungsi campur kode*

## **CODE MIXING IN JALAN2MEN! TRAVEL SERIES**

### **ABSTRACT**

This thesis discusses the use of code mixing by 2 presenters on Jalan2Men! Travel Show, Jebraw (Petra Gabriel Michael) and Naya (Naya Andita) in the second season of Jalan2Men! Travel show video. This study aims to identify the types and describe the interfering functions that they said. Data collection is done by downloading techniques. Data were analyzed based on code mixing theory by Muysken (2000) about the types of code mixing and the theories of Hoffman (1991) and Saville-Troike (2003) to determine the function of code mixing.

From the results of the analysis, 58 sentences that contain code mixing were founded. The sentences that contain code mixing then grouped by type (1) insertion, (2) alternation, and (3) congruent lexicalization. The most used type of code mixing is insertion (43.1%) with 25 data, then followed with alternation (41.4%) with 24 data, and the least is congruent lexicalization (15.5%) with 9 data. Then, the code mixing function that found are talking about a particular topic, interjection, repetition used for clarification, and because of real lexical need. The most used code mixing function is talking about particular topic (70.7%) with 41 data, then followed by because of lexical need (10.3%) with 6 data, to soften and strengthen request or command (8.6%) with 5 data, repetition for clarification (6.9%) with 4 data, and interjection (inserting sentence fillers or sentence connectors) (3.5%) with 2 data. It can be concluded that they tend to mix code with insertion types. They inserted English vocabulary in a speech on video while talking about particular topics became the most used function because of the background of each speaker who had lived and studied English abroad, they felt more comfortable using English in delivering some speeches.
