

CHAPTER IV

CONCLUSION

4.1 Conclusion

In this section, the analysis that has been done before is elaborated. The finding is concerned with the nominal phrases found in the twelve song lyrics of Nicole album. According to the findings, nominal phrases can be differentiated into several classifications. The finding showed three classifications. The first classification is the types of nominal phrases based on the functional element structure. The typical types of the first classification are 1) determiner – headword structure, 2) determiner – headword – qualifier structure, and 3) determiner – modifier – headword structure. The second classification is the system of the functional element of the nominal phrase filled by the grammatical class category. It is found that the typical types of this classification are 1) article as the determiner, 2) possessive pronoun as the determiner, and 3) adjective as the qualifier. The last classification of nominal phrases in Nicole album is the system of functional element structure filled by its grammatical class category. This classification shows three typical systems of nominal phrases, they are; 1) article – noun structure, 2) possessive pronoun – noun structure, and 3) article – noun – prepositional phrase structure.

In connection with register, there will always be context in every language that exists. The functional syntactic analysis is not only used to analyze the syntactic structures of the nominal phrase in Nicole album but also used to understand the register of the song lyrics. To conclude, the song lyrics from twelve songs in Nicole

album by NIKI are systemic to create a descriptive and understandable song lyric. In other words, the findings show the lyrics from Nicole album are in the paradigmatic ordering in language where the use of functional elements is replaceable with each other without changing the entire structure of the sentence or the lyrics.

4.2 Suggestion

The writer suggests exploring other song genres when researching functional syntactic analysis in song lyrics. Other than that, the writer also suggests researching other types of data, for example, poems or novels.
