ANALYSIS OF CONSUMER SATISFACTION AT KELOKOPI COFFEE SHOP IN BATUSANGKAR CITY

Abstract

The coffee shop business has expanded significantly in Batusangkar City. Kelokopi coffee shop is one of the coffee shops known for its distinctive layout, and it has been operating for five years in Batusangkar City. Kelokopi faces competition in the coffee shop business and has experienced fluctuating revenues, which means coffee shop managers need to understand the wants and needs of their consumers in order to remain competitive. This study aims to describe consumer characteristics and analyze consumer satisfaction at Kelokopi coffee shop. This study employed a survey method by distributing questionnaires to 72 respondents who are consumers of Kelokopi coffee shop. The results showed that Kelokopi's consumers were predominantly male, with 43 respondents being male, and mostly in early adulthood (19-24 years old). The majority of respondents' last level of education was senior high school (SMA), and they were primarily students with an income of >500,000 – 1,500,000 IDR, residing in Batusangkar City. The results of the Importance Performance Analysis indicate that the average level of importance reached 4.14, signifying it as important, and the average level of performance reached 4.04, meaning that overall, it was rated positively by consumers. However, performance indicators which were unsatisfactory for consumers include the portion size of food and beverages, which were considered small, especially beverages served in plastic cups, and the availability of signage, which was seen as inadequate and did not attract consumer attention. Therefore, Kelokopi coffee shop must improve these two indicators to increase consumer satisfaction. Meanwhile, the value of the Customer Satisfaction Index was 0.812, which means that the overall indicators of Kelokopi coffee shop satisfied consumers
