

CHAPTER IV

CONCLUSION

4.1 Conclusion

This research analyzes the translation techniques of English participial phrases in the short story *A Good Man is Hard to Find*. In analyzing the data, the researcher uses two theories. First is the translation techniques theory proposed by Molina and Albir (2002) and the second is types of English participial phrases proposed by DeCapua (2017).

Based on this research, 45 English Participial phrases from short story *A Good Man is Hard to Find* by Flannery O'Connor and its translation *Sulitnya Menemukan Orang Baik* by Imanina Resti Sujarwanto were collected as data. There are three points in this study. The first one is the type of English participial phrase: present participial phrase and past participial phrase with a total of 45 data. The second one is the translation techniques applied in translate English participial phrase into Indonesian. There are seven translation techniques were applied: linguistic amplification 13 times, literal translation 11 times, amplification 8 times, particularization 6 times, reduction 4 times, transposition 2 times, and adaptation 1 time. The last point is the most dominant technique used in translating English participial phrase: linguistic amplification for 13 times.

4.2 Suggestion

This research only focuses on analyzing the translation techniques of English participial phrases, particularly in short story. By seeing this research, the writer suggests the next researchers can analyze and discuss more topics about English participial phrase in other translation projects, not only in short story but also in movies, novels, songs, etc.
