# **EFEKTIVITAS PROGRAM YAYASAN KESEJAHTERAAN MADANI (YAKESMA) DI KELOMPOK WANITA TANI JAWA GADUIK SAIYO**

## **Abstrak**

Penelitian ini bertujuan untuk menganalisis efektivitas program Yayasan Kesejahteraan Madani (YAKESMA) di Kelompok Wanita Tani (KWT) Jawa Gaduik Saiyo dan mengidentifikasi kendala pelaksanaan program. Metode penelitian yang digunakan adalah survei dengan pendekatan deskriptif kualitatif menggunakan kuisioner. Sampel pada penelitian ini adalah anggota KWT Jawa Gaduik Saiyo yang mendapatkan bantuan program sebanyak 16 orang. Efektivitas program diukur menggunakan lima indikator, yaitu pemahaman program; ketepatan sasaran; ketepatan waktu; tercapainya tujuan; dan perubahan nyata dengan menggunakan skala Guttman. Standar ukuran efektivitas mengacu pada Litbang Depdagri tahun 1991. Analisis data menunjukan bahwa indikator perubahan nyata (90,625%) dan indikator pemahaman program (87,5%) masuk dalam tingkat capaian sangat efektif; serta indikator ketepatan waktu (71,875%), indikator ketepatan sasaran (62,5%), dan indikator tercapainya tujuan (62,5%) masing-masing masuk dalam tingkat capaian cukup efektif. Berdasarkan hasil efektivitas dari lima indikator tersebut, maka efektivitas program YAKESMA di KWT Jawa Gaduik Saiyo secara keseluruhan dengan nilai 75% masuk dalam tingkat capaian cukup efektif. Kendala yang dialami selama pelaksanaan program YAKESMA diantaranya keterlambatan penyaluran bantuan program; minimnya kehadiran anggota pada kegiatan program; serta kurangnya transparansi YAKESMA dalam penyaluran bantuan program.

# **EFFECTIVENESS OF THE YAYASAN KESEJAHTERAAN MADANI (YAKESMA) PROGRAM IN JAWA GADUIK SAIYO FARMER WOMEN GROUP**

## **Abstract**

This research aims to analyze the effectiveness of the Yayasan Kesejahteraan Madani (YAKESMA) program in the Farmer Women Group (KWT) Jawa Gaduik Saiyo and to identify barriers to program implementation. The research method used is a survey with a qualitative descriptive approach using a questionnaire. The sample in this study consisted of 16 members of KWT Jawa Gaduik Saiyo who received program support. The effectiveness of the program was measured using five indicators, namely program understanding, accuracy of targeting, timeliness, achievement of goals, and real changes, using Guttman's scale. The standard measure of effectiveness referred to the Ministry of the Interior's R&D from 1991. Data analysis showed that the real change indicator (90.625%) and the program understanding indicator (87.5%) fell into the highly effective achievement level; the timeliness indicator (71.875%), the target accuracy indicator (62.5%), and the goal achievement indicator (62.5%) each fell into the moderately effective achievement level. Based on the effectiveness results of the five indicators, the overall effectiveness of the YAKESMA program in KWT Jawa Gaduik Saiyo with an overall score of 75% was categorized as quite effective. Obstacles experienced in the implementation of the YAKESMA program included delays in the distribution of program assistance, minimal participation of members in program activities, and lack of transparency by YAKESMA in the distribution of program assistance.
