**ANALISIS SANITASI MASJID DI KAWASAN WISATA PANTAI
KECAMATAN PADANG BARAT KOTA PADANG TAHUN 2024**

xii + 116 halaman, 28 tabel, 13 gambar, 11 lampiran

ABSTRAK

Tujuan Penelitian

Masjid sebagai tempat ibadah adalah penunjang objek wisata. Aspek sanitasi masjid perlu diperhatikan untuk mencegah permasalahan kesehatan masyarakat dan lingkungan. Studi awal menunjukkan bahwa tiga dari lima masjid di kawasan wisata pantai di Kecamatan Padang Barat Kota Padang belum memenuhi syarat sanitasi masjid. Penelitian ini bertujuan untuk menganalisis penerapan sanitasi di kawasan wisata tersebut.

Metode

Penelitian dilakukan di lima masjid kawasan wisata pantai Kecamatan Padang Barat pada bulan Maret 2024 sampai Januari 2025 menggunakan metode kualitatif dengan 11 informan yang dipilih dengan teknik *purposive sampling*. Teknik pengumpulan data dengan wawancara mendalam, telaah dokumen dan observasi. Analisis data menggunakan triangulasi sumber dan metode dengan menilai kesesuaian *input*, proses dan *output* program sanitasi masjid berdasarkan dalam Peraturan Menteri Kesehatan No.2 Tahun 2023 tentang Pelaksanaan Kesehatan Lingkungan.

Hasil

Pada aspek sarana dan prasarana masjid terdapat tiga masjid belum memenuhi persyaratan sanitasi yang berlaku seperti kurang tercukupinya fasilitas air bersih, tempat sampah, jamban serta bangunan masjid yang masih belum memadai. Pada aspek pengawasan, semua masjid belum dilakukan pengawasan dalam program sanitasi oleh Puskesmas Padang Pasir. Pada aspek pelaporan, tidak ada pelaporan sanitasi masjid pada pengelola masjid.

Kesimpulan

Penerapan sanitasi di masjid belum terlaksana dengan baik. Sehingga, diperlukan upaya perbaikan dan kerjasama pengelola masjid dengan instansi terkait demi penerapan sanitasi masjid yang memenuhi persyaratan yang berlaku.

**ANALYSIS OF MOSQUE SANITATION IN THE BEACH TOURISM AREA
IN THE WEST PADANG SUB-DISTRICT OF PADANG IN 2024**

xii + 116 pages, 28 tables, 13 pictures, 11 appendices`

ABSTRACT

Objective

Mosques as places of worship are supporting tourist attractions. Mosque sanitation aspects need to be considered to prevent public health and environmental problems. Initial studies showed that three out of five mosques in the coastal tourism area in Padang Barat Sub-district, Padang City have not fulfilled the mosque sanitation requirements. This study aims to analyse the application of sanitation in the tourist area.

Method

The research was conducted in five mosques in the coastal tourism area of Padang Barat Sub-district from March 2024 to January 2025 using qualitative methods with 11 informants selected using purposive sampling techniques. Data collection techniques included in-depth interviews, document review and observation. Data analysis used triangulation of sources and methods by assessing the suitability of inputs, processes and outputs of the mosque sanitation programme based on the Minister of Health Regulation No.2 of 2023 concerning Environmental Health Implementation.

Result

In the aspect of mosque facilities and infrastructure, there are three mosques that have not fulfilled the applicable sanitation requirements such as insufficient clean water facilities, trash bins, latrines and mosque buildings that are still inadequate. In the aspect of supervision, all mosques have not been supervised in the sanitation programme by the Padang Pasir Health Centre. In the reporting aspect, there is no reporting of mosque sanitation to the mosque manager.

Conclusion

The implementation of sanitation in mosques has not been implemented properly. So, improvement efforts and cooperation between mosque managers and related agencies are needed for the implementation of mosque sanitation that meets applicable requirements.
