ABSTRACT

Road Construction of Selat Lampa - Teluk Depih - SP. Sekunyam (Road Diversion) (MYC) is an activity organized by the Ministry of Public Works and Public Housing through the Direktorat Jenderal Bina Marga, Balai Pelaksanaan Jalan Nasional Kepulauan Riau, PPK 1.4 (Kepulauan Riau Province) with SBSN Funding Source for Fiscal Year 2020 - 2022.

This activity is carried out to improve and enhance the quality of road services so as to provide comfort for road users by moving / diverting the Road Trace which was originally the Road Trace from Selat Lampa - Sp. Sekunyam - Ranai, to the New Trace of Selat Lampa - Teluk Depih - Sp. Sekunyam - Ranai Road. The Trace Diversion was carried out because the old Trace had a Grade greater than 10%, this reducing the effectiveness and ability of transport vehicles in carrying out their activities. Selat Lampa - Teluk Depih – SP. Sekunyam Road Section is located in Bunguran Selatan District, Natuna Regency, Kepulauan Riau Province.

Construction management is well planned and implemented in the Selat Lampa - Teluk Depih - SP. Sekunyam Road Construction (Road Transfer) (MYC) work. The implementation of good construction management will reduce the risk of work accidents and produce good work methods, so it will produce on time work, right quality and at the right cost.
