ABSTRACT

Ubi Bakar Madu Asli Cilembu Khas Bandung, located in the city of Padang, has experienced fluctuations in sales, inconsistent consumer turnout, and several customer complaints regarding certain aspects of the product. This study aims to analyze the characteristics of Cilembu roasted sweet potato consumers and assess the level of consumer satisfaction with Cilembu roasted sweet potato in Padang City. This research was conducted at Ubi Bakar Madu Asli Cilembu Khas Bandung, which took place from December 23 to January 23, 2025. This research employed a survey method to collect data from 60 respondents selected through accidental sampling from two business branches. This research used a quantitative descriptive analysis approach, utilizing the Importance-Performance Analysis (IPA) method and the Customer Satisfaction Index (CSI) method. The research found that the characteristics of Cilembu roasted sweet potato consumers are women aged over 19 years old, have a family of 4-5 people, work as students, have a high school education, and have a monthly income of Rp. 500,000-Rp. 1,000,000. Based on IPA analysis, attributes considered good and important by consumers include product flavour, product texture, price compatibility with benefits, and price compatibility with product quality. Meanwhile, attributes that need improvement include product packaging, product durability, affordability, sales location, and the cleanliness and comfort of the venue. The CSI value of 78.82% indicates that consumers are generally satisfied with ubi bakar Cilembu, although improvements are still needed in several key attributes to meet consumer expectations better. Therefore, it is expected that the business owner will improve these attributes by enhancing the quality of packaging and labelling, providing clear storage instructions, offering price variations, enlarging the signage, and reorganizing the sales area to create a more comfortable environment.
