ANALISIS KEIKUTSERTAAN PETANI DALAM ASURANSI USAHATANI PADI (AUTP) DI KECAMATAN PARIAMAN TIMUR

ABSTRAK

Penelitian ini bertujuan untuk menganalisis (1) Pelaksanaan program AUTP di Kecamatan Pariaman Timur (2) Keikutsertaan petani dalam asuransi usahatani padi di Kecamatan Pariaman Timur. Penelitian ini dilakukan pada 25 Maret – 25 April 2019. Data yang digunakan dalam penelitian ini adalah data primer dan data sekunder. Metode yang digunakan adalah metode survey. Penelitian ini menggunakan pendekatan kombinasi kualitatif dan kuantitatif. Sebanyak 34 responden dipilih secara acak dari petani yang mengikuti program AUTP. Selain itu, dengan pendekatan kualitatif diharapkan dapat diungkapkan situasi dan permasalahan yang dihadapi petani dalam keikutsertaan AUTP. Data dianalisis secara kualitatif untuk memperoleh informasi mengenai keikutsertaan petani pada Asuransi Usahatani Padi secara mendalam dan komprehensif. Hasil analisis menunjukkan bahwa (1) Pelaksanaan program AUTP di Kecamatan Pariaman Timur yang mulai diterapkan sejak April 2016 telah dilaksanakan sesuai dengan pedoman pelaksanaan yang disusun oleh Direktorat jendral prasarana dan sarana kementerian pertanian dalam aspek Pengorganisasian,persyaratan mengikuti AUTP,risiko yang dijamin AUTP, ganti rugi dalam AUTP, penetapan Premi dan jangka waktu pertanggungan dalam Asuransi Usaha Tani Padi. (2) Petani di Kecamatan Pariaman Timur yang ikut serta dalam program asuransi usaha tani ini masih banyak yang belum memahami bagaimana tahapan dalam program AUTP. Petani merasa keberatan jika harus menunggu total kerusakan pada lahannya sebanyak 75% per petakan.

Kata Kunci: Keikutsertaan, Asuransi, Petani.

ANALYSIS OF FARMERS PARTICIPATION IN RICE FARMING INSURANCE (AUTP) PROGRAM IN PARIAMAN TIMUR SUB-DISTRICT

ABSTRACT

| This study aims to analyze (1) Implementation of the AUTP program in Pariaman Timur Sub-district, (2) participation of farmers in rice farming insurance in Pariaman Timur Sub-district. This research was conducted during 25 March - 25 April 2019. The data used in this study were primary and secondary data. This study used both qualitative and quantitative approach. For about 34 respondents were selected randomly from farmers who join AUTP. The method used is the survey method, the sampling method is determined randomly or randomly. To determine the number of respondents used Slovin formula so that the sample used in the study amounted to 34 respondents. In addition, a qualitative approach is expected to reveal the situation and problems faced by farmers in the participation of AUTP. Data were analyzed qualitatively to obtain information about the participation of farmers in Rice Farm Insurance in depth and comprehensively. In addition, a qualitative approach is expected to reveal the situation and problems faced by farmers in the participation of AUTP. The results of the analysis show that (1) the implementation of the AUTP program in Pariaman Timur Subdistrict which began to be implemented since April 2016 has been carried out in accordance with the implementation guidelines compiled by the Directorate General of infrastructure and facilities of the Ministry of Agriculture in terms of organizing aspects, requirements to follow AUTP, risks guaranteed by AUTP, compensation in AUTP, determination of insurance premiums and the period of coverage in (2) Many farmers in the Pariaman Timur District who participated in the farming insurance program still did not understand about the stages in the AUTP program. Farmers feel reluctant if they have to wait for a total damage of 75% per plot.
