PELAKSANAAN FUNGSI KELOMPOK TANI MAYANG SARI DI NAGARI ANDALEH BARUH BUKIK, KECAMATAN SUNGAYANG, KABUPATEN TANAH DATAR, PROVINSI SUMATERA BARAT

Abstrak

Gula aren berperan sebagai sumber energi, kaya nutrisi, serta mendukung keberlanjutan lingkungan dan perekonomian masyarakat pedesaan. Fungsi kelompok tani sebagai unit belajar, kerja sama, produksi, dan usaha/bisnis sangat penting dalam pengembangan gula aren dan peningkatan kapasitas anggotanya. Tujuan penelitian yaitu mendeskripsikan fungsi kelompok tani Mayang Sari di Nagari Andaleh Baruh Bukik, Kecamatan Sungayang, Kabupaten Tanah Datar, Provinsi Sumatera Barat. Jenis penelitian yaitu penelitian deskriptif kualitatif dengan pendekatan studi kasus. Pengumpulan data dapat dilakukan dengan observasi, interview, dan dokumentasi. Analisis data dalam studi melakukan empat kegiatan analisis teknik reduksi data, penyajian data dan menarik kesimpulan. Hasil penelitian memperlihatkan kelompok tani Mayang Sari telah melaksanakan kegiatan sebagai unit belajar, unit kerjasama, unit produksi, dan unit usaha/bisnis dengan aktivitas seperti pertemuan rutin, pameran gula aren, pelibatan wanita, kesepakatan anggota, pembagian tugas, rencana usaha tani, penyediaan fasilitas bersama, serta pengelolaan usaha tani secara komersial dan berkelanjutan. Namun kelompok ini belum melaksanakan berbagai fungsi penting seperti menghadirkan narasumber, mengikuti pelatihan, melibatkan pemuda, menjalin kerjasama dengan pihak luar, menetapkan pola usahatani, menerapkan teknologi tepat guna, menganalisis usaha, memperkuat kegiatan bersama, maupun melakukan pemupukan modal.

IMPLEMENTATION OF THE FUNCTIONS OF THE MAYANG SARI FARMERS GROUP IN ANDALEH BARUH BUKIK VILLAGE, SUNGAYANG DISTRICT, TANAH DATAR REGENCY, WEST SUMATERA PROVINCE

Abstract

Palm sugar serves as a source of energy, contains rich nutrients, and contributes to both environmental sustainability and the rural economy. The roles of farmer groups as units of learning, cooperation, production, and business are crucial for developing palm sugar and enhancing members' capacities. The purpose of this study was to describe the functions of the Mayang Sari Farmers Group in Andaleh Baruh Bukik Village, Sungayang District, Tanah Datar Regency, West Sumatera Province. This study employed a descriptive qualitative method with a case study approach. Data collection was conducted using observation, interviews, and documentation. Data analysis involved four stages: data reduction, data presentation, verification, and conclusion drawing. The results of the study indicate that the Mayang Sari Farmers Group has functioned as a learning, cooperation, production, and business unit through activities such as regular meetings, palm sugar exhibitions, women's involvement, member agreements, task division, business planning, provision of shared facilities, and management of commercial and sustainable farming practices. However, this group has not yet implemented several important functions, including inviting resource persons, participating in training, involving youth, establishing partnerships with external stakeholders, determining farming patterns, applying appropriate technology, conducting business analysis, strengthening collective activities, and building capital accumulation.
