ABSTRACT

This research aimed to analyze the effect of infrastructure and education to increase the standard of living in case of involuntary resettlement in Koto Panjang. This research used primary data in 2006 and the number of respondents is about 225 people or family heads. By using SEM (Structural Equation Model), the result indicates that infrastructure have positive and significant effect on standard of living for all indicators. But in education, one indicator is insignificant effect and others indicators is significant effect on standard of living.

Key word : Involuntary resettlement, standard of living, infrastructure, education, SEM

This thesis has been presented before the examiners in the thesis examination and successfully passed the thesis examination on October 11st 2019
