

CHAPTER 4

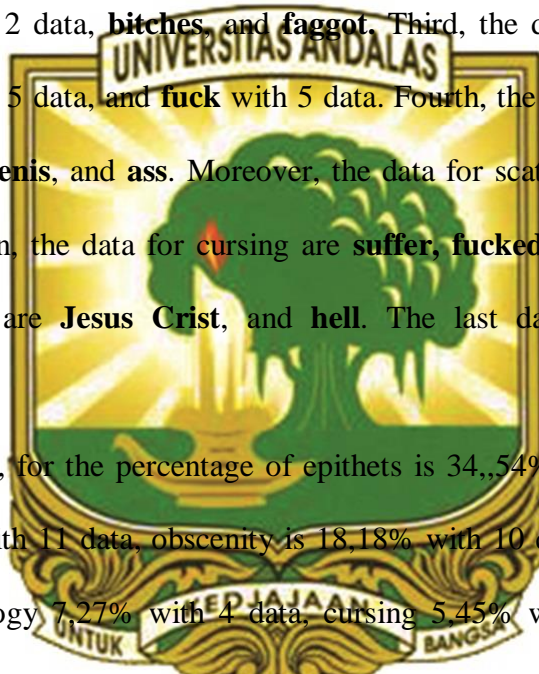

CONCLUSION AND SUGGESTION

4.1. CONCLUSION

After analyzing 4 songs in Eminem's Album Kamikaze, the writer finds all types of taboo words that are proposed by Jay (1992, p. 1), such as epithets, insult and slurs, obscenity, vulgarity, scatology, cursing, profanity, and blasphemy. First, the data for epithets are **fuck up, bitch, shit** with 9 data, **fucking** with 5 data, **fuck** with 3 data, and **hell**. Second, the data for insult and slurs are **bitch** with 5 data, **stupid, nigga** with 2 data, **bitches, and faggot**. Third, the data for obscenity are **motherfucker** with 5 data, and **fuck** with 5 data. Fourth, the data for vulgarity are **dick** with 3 data, **penis, and ass**. Moreover, the data for scatology are **shit** with 3 data, and **piss**. Then, the data for cursing are **suffer, fucked, and butt**. Next, the data for profanity are **Jesus Crist, and hell**. The last data for blasphemy is **sacreligious**.

Furthermore, for the percentage of epithets is 34,54% with 19 data, insult and slurs is 20% with 11 data, obscenity is 18,18% with 10 data, vulgarity is 9,09% with 5 data, scatology 7,27% with 4 data, cursing 5,45% with 3 data, profanity 3,63% with 2 data, and blasphemy 1,8% with 1 data. In this research, epithets, insult, and slurs, and obscenity become the most dominant types of taboo words.

In this research, the writer uses the meaning proposed by Leech theory (1981, p. 9) and for the word meanings supported by Oxford Dictionary and Urban Dictionary. Besides that, there are five functions of language proposed by Leech (1974, p. 40), such as informational function, expressive function, directive function, phatic function, and poetic function. The percentage of informational function is 45,45% with 24 data, expressive function 41,81% with 23 data, directive

function 12,72% with 7 data. In this study, the informational function becomes the most dominant function of languages.

In conclusion, Eminem tends to use taboo words in epithets type to express his feeling towards the young rappers and people who do not appreciate him. Moreover, the dominant function of language that he tends to use is the informational function. Then, two functions that can not found in this song are aesthetic functions and phatic functions; the reason is Eminem songs mostly contain Eminem feelings that he writes into a song and the absence of poetic or artistic words.

4.2 SUGGESTION

The writer realizes that this research is still not a comprehensive study. Some related studies extended to develop the study of taboo words. Therefore, the writer suggests the next researcher continue the research about taboo words from another aspect.
