

DAFTAR KEPUSTAKAAN

1. AASHTO. 1993. *Guide for Design of Pavement Structure*. Washington DC.
2. Bina Marga. *Spesifikasi Umum 2010*. Direktorat Jendral Bina Marga. Departemen Pekerjaan Umum.
3. Brown SF, 1980. *An Introduction To The Analytical design Of Bitumeminous Pavement*. London: University Of Nottingham. Campuran, Methode CQCMU, Indec, Ass Ltd., Bandung.
4. Della, V.P., Kuhn, I., Hotza, D., 2002. *Rice husk ash as an alternatesource for active silica production*. Mater. Lett. 57, 818–821.
5. Epps, J.A. 1986. *Asphalt Pavement Modifiers*. The Magazine of Civil Engineering, April 1986
6. Huffman, J.E. 1980. *Sahuario Concept of Asphalt-Rubber Binders*. Presentation at the First Asphalt Rubber User Producer Workshop. Scottsdale, Arizona.
7. Iskandar, T. 2014. *Studi Penentuan Nilai Modulus Kekakuan Aspal Beton Tipe AC-WC*. Jurnal, Universitas Sumatera Utara, Medan.
8. Laboratorium Transportasi dan Perkerasan Jalan Raya. 2009. *Buku Penuntun Praktikum Bahan Perkerasan Jalan Raya*. Jurusan Teknik Sipil Universitas Andalas. Padang.
9. Leksiminingsih. 2000. *Pendekatan Sifat Aspal Terhadap Kinerja. Konferensi Regional Teknik Jalan Ke-6*. Jakarta. Paper 2.06.
10. Sukirman, S. (1990), *Aspal Beton Campuran Panas, Rancangan Campuran, Methode CQCMU*, Indec, Ass Ltd., Bandung.
11. Robinson, H. L. 2004. *Polymer in Asphalt*. Rapra Review Reports Volume 15, Number 11, 2004. Tarmac Ltd, UK.

12. Sutanto, M. 2018. *Properties of Crumb Rubber and Latex Modified Asphalt Binder using Superpave Test*. MATEC Web of Conference 203, Malaysia.

13. Van der Poel, C. (1990). *General system describing the viscoelastic properties of bitumens and its relations to routine test data*. *Journal of Applied Chemistry*, pp.221-236, Whiteoak,D., The Shell bitumen handbook, Shell bitumen, UK.

14. Zhu, J., Birgisson, B., Kringos, N. 2014. *Polymer Modification of Bitumen: Advance and Challenges*. *European Polymer Jurnal*, 54: 18-38. Swedia.
