

CHAPTER V

CONCLUSION AND SUGGESTIONS

5.1 Conclusion

Based on the research that has been done, it can be concluded that the designed asset replacement analysis software helps the manager in making asset replacement submission by asset replacement calculation in order to support suggestion to replacing asset. The software has main functions as the software to generate and display a result in asset replacement calculation to strengthen justification of the workshop manager to make asset replacement submission.

5.2 Suggestion

Based on research that has been done, suggestions that can be given to further researchers for the development of software for asset replacement in the Workshop PT Semen Padang are as follows:

- 1 The next design is expected to integrate the workshop database center with database software to require no data transfer.
- 2 The next design is expected to involve other actors, the head of unit and the operator.
- 3 Research can be carried out to design software for seeking challenger for replacing asset.
