Gambaran Sarana Protokol Kesehatan Sekolah Dasar dalam Melaksanakan
Pembelajaran Tatap Muka di Masa Pandemi COVID-19 di Kota Padang

ABSTRAK

Laporan kurangnya sarana protokol kesehatan yang memadai di sekolah datang dari berbagai pihak, padahal untuk memulai sekolah tatap muka di masa pandemi COVID-19 pihak sekolah harus mempersiapkan sekolah yang lebih aman. Kota Padang ikut dalam melaksanakan pembelajaran tatap muka terhitung sejak awal semester genap tahun ajaran 2020/2021. Penelitian ini bertujuan untuk mengetahui gambaran sarana protokol kesehatan di Sekolah Dasar dalam melaksanakan pembelajaran tatap muka di masa pandemi COVID-19 di Kota Padang. Desain penelitian menggunakan metode deskriptif dengan pendekatan kuantitatif dengan metode survei. Jumlah sampel 60 Sekolah Dasar dengan teknik *propotional random sampling*. Data dikumpulkan dengan observasi dan pengisian instrumen lembar *checklist* sarana protokol kesehatan saat melaksanakan pembelajaran tatap muka di masa pandemi COVID-19. Pengolahan data dilakukan dengan sistem komputerisasi dan dianalisis dengan analisa univariat. Hasil penelitian menunjukkan 73,3% Sekolah Dasar memiliki sarana cuci tangan pakai sabun(CTPS)/*Hand sanitizer* yang sesuai, 75,0% Sekolah Dasar memiliki perlengkapan disinfeksi yang sesuai, 70,0% Sekolah Dasar memiliki sarana kebersihan yang sesuai, 73,3% Sekolah Dasar memiliki *thermo gun* yang sesuai, 50,0% Sekolah Dasar melaksanakan pengaturan kelas sesuai standar dan 48,3% Sekolah Dasar menyediakan masker cadangan yang jumlahnya memenuhi standar minimum. Perlu adanya kegiatan evaluasi secara rutin terkait ketersediaan sarana protokol kesehatan Sekolah Dasar selama pembelajaran tatap muka di masa pandemi COVID-19.

Overview of Elementary School Health Protocols in Implementing Face-to-Face Learning During the COVID-19 Pandemic in Padang

ABSTRACT

Reports of the lack of adequate health protocol facilities in schools come from various parties, although to start face-to-face schools during the COVID-19 pandemic, schools must prepare safer schools. Padang participates in carrying out face-to-face learning starting at the beginning of the even semester of the 2020/2021 academic year. This study aims to determine the description of health protocol facilities in elementary schools in implementing face-to-face learning during the COVID-19 pandemic in Padang. The research design used a descriptive method with a quantitative approach to the survey method. The number of samples is 60 elementary schools with proportional random sampling technique. Data was collected by observing and filling out the checklist instrument for health protocol facilities when implementing face-to-face learning during the COVID-19 pandemic. Data processing is done by computerized system and analyzed by univariate analysis. The research results showed 73.3% of elementary schools had appropriate means of washing hands with soap (CTPS)/hand sanitizers, 75.0% of elementary schools had appropriate disinfection equipment, 70.0% of elementary schools had appropriate sanitizing facilities, 73.3% of elementary schools have a suitable thermo gun, 50.0% of elementary schools carry out standardized classroom arrangements and 48.3% elementary schools provide spare masks that meet the minimum standards. There needs to be regular evaluation activities related to the availability in elementary school health protocol facilities face-to-face learning during the COVID-19 pandemic.
