Hubungan Pengetahuan dan Sikap Guru SD 03 Alai Padang dengan Perilaku Pencegahan COVID-19

Kasus COVID-19 terus mengalami peningkatan sehingga pengetahuan, sikap dan perilaku menjadi peranan penting sebagai bentuk upaya pencegahan penyebaran COVID-19. Guru merupakan seorang pendidik dan menjadi tokoh sentral serta teladan di masa pandemi. Penelitian ini bertujuan untuk mengetahui hubungan antara pengetahuan dan sikap guru SD 03 Alai Padang dengan perilaku pencegahan COVID-19. Jenis penelitian ini menggunakan desain analitik dengan pendekatan *cross sectional study*. Sampel penelitian berjumlah 39 guru dengan menggunakan *total sampling*. Metode pengambilan data menggunakan kuesioner pengetahuan, sikap dan perilaku yang disebarakan secara online. Hasil penelitian menunjukkan bahwa sebanyak 82,1% responden memiliki pengetahuan baik, 48,7% responden memiliki sikap positif, 69,2% responden memiliki perilaku pencegahan COVID-19 yang baik. Menggunakan uji *chi-square*, terdapat hubungan yang signifikan antara pengetahuan dengan perilaku pencegahan COVID-19 ( $p= 0,001$ ) dan terdapat hubungan antara sikap dengan perilaku pencegahan COVID-19 ( $p= 0,048$ ). Kesimpulan penelitian ini adalah guru SD 03 Alai Padang memiliki pengetahuan, sikap, dan perilaku pencegahan yang baik terhadap COVID-19, diharapkan perilaku pencegahan ini dapat dipertahankan dan ditingkatkan dalam upaya memutus rantai penyebaran COVID-19.

*The Relation Between Knowledge and Attitudes of Teacher Elementary School 03  
Alai Padang with Preventive Behavior COVID-19*

**ABSTRACT**

Cases of COVID-19 continue to increase so that knowledge, attitudes, and behavior play an important role to prevent the spread of COVID-19. A teacher is an educator also becomes a central figure and role model during a pandemic. This research aims to determine the relationship between the knowledge and attitudes of SD 03 Alai Padang teachers with COVID-19 prevention behavior. The type of research uses an analytical design with a cross-sectional study approach. The sample used for analysis was amounted to 39 teachers using total sampling. Data was collected from a knowledge, attitude, and behavior questionnaire which was distributed online. The results showed that 82.1% of respondents had good knowledge, 48.7% of respondents had a positive attitude, 69.2% of respondents had good COVID-19 prevention behavior. Using the chi-square test, there was a significant relationship between knowledge and COVID-19 prevention behavior ( $p= 0.001$ ) and there was a relationship between attitude and COVID-19 prevention behavior ( $p= 0.048$ ). This study concludes that elementary school teachers 03 Alai Padang have good knowledge, attitudes, and preventive behavior against COVID-19, it is hoped that this preventive behavior can be maintained and improved to break the chain of the spread of COVID-19.
