Bachelor of Economics

Poverty is a rooted thing in society, the cause of poverty is a big challenge for the government in advancing a country's economy. One of the benchmarks in the success of a country's development can be seen from the decline in the number of poor people. Although they have struggled for decades to free themselves from poverty, the reality shows that Indonesia has not been able to escape from this bondage of poverty. Poverty causes millions of people to meet limited needs for food, clothing and shelter. The aim of this study to analyze the effect of education on poverty in West Sumatera. This study used secondary data from period 2010-2020 and used panel data analysis. The model used in this is BB-GMM. The result of this study means years school and net enrollment rate have negative and significant to poverty. Literacy rate has positive and significant to poverty.

Keywords: poverty, education, West Sumatera
