ANALISIS PELAKSANAAN PELACAKAN KONTAK (CONTACT TRACING) COVID-19 DI PUSKESMAS WILAYAH KECAMATAN KURANJI KOTA PADANG TAHUN 2021

xii + 104 halaman, 10 tabel, 13 gambar, 12 lampiran

ABSTRAK

Tujuan Penelitian

Salah satu upaya memutus penularan Covid-19 adalah meningkatkan pelacakan kontak Covid-19. Kasus Covid-19 terbanyak di Kota Padang terjadi di Kecamatan Kuranji, untuk memutus rantai penyebarannya perlu melakukan pelacakan kontak. Penelitian ini bertujuan untuk mengetahui secara mendalam pelaksanaan pelacakan kontak Covid-19 di Puskesmas Wilayah Kecamatan Kuranji.

Metode

Metode penelitian adalah kualitatif, dilakukan dari bulan Januari - Juli 2021. Penentuan informan melalui *purposive sampling* yang berjumlah 7 orang, pengumpulan data dengan wawancara mendalam dan telaah dokumen. Analisis data dengan pendekatan *content analysis*. Data diolah dengan triangulasi sumber dan triangulasi metode.

Hasil

Hasil pada *input* belum diadakan pelatihan pelacakan kontak untuk Surveilans Puskesmas. *Process* kendalanya alamat tidak ditemukan, nomor hp tidak bisa dihubungi, kontak erat tidak mau *test swab*, pasien positif tidak mau memberikan data, kontak erat tidak mau isolasi mandiri. *Output* masih ada *tracer* yang belum bisa *mengentry* data.

Kesimpulan

Pelaksanaan pelacakan kontak Covid-19 pada *man* (pelatihan SDM), *money*, *material*, *process* dan *output* belum maksimal, disarankan Puskesmas untuk lebih gencar dalam melakukan edukasi Covid-19 kepada masyarakat dan edukasi cara *mengentry*kan data kepada *tracer*.

ABSTRACT

Objective

One of the efforts to stop the transmission of Covid-19 is improving the Covid-19 contact tracing. The most cases of Covid-19 in Padang City in Kuranji District, to break the chain of spread it is necessary to do contact tracing. This study aims to find out in depth the implementation of Covid-19 contact tracing in Kuranji District Health Center.

Method

The method is qualitative, conducted from January - July 2021. Determination of informants through purposive sampling of 7 people, data collection with in-depth interviews and document review. Data analysis using content analysis approach. Data were processed by source triangulation and method triangulation.

Results

The results show that contact tracing training has not been held for Puskesmas Surveillance yet. Process constraints address not found, mobile number can not be contacted, close contacts do not want to take swab tests, positive patients do not want to provide data, close contacts do not want to do self-isolate. The output is that there is still a tracer that has not been able to entry data.

Conclusion

The implementation of Covid-19 contact tracing in man (human resources training), money, material, process and output has not been maximized, it is recommended that the Health Center be more intense in conducting Covid-19 education to the public and education how to entry data to tracers.
